

CHARGER ARMOR

PLP's Charger Armor is a durable security enclosure designed to protect Level 1 and Level 2 EV chargers from theft, tampering, and vandalism. Its universal mounting design accommodates most charging units through an adaptable charger mounting plate, providing a flexible solution for a wide range of EV charging applications.

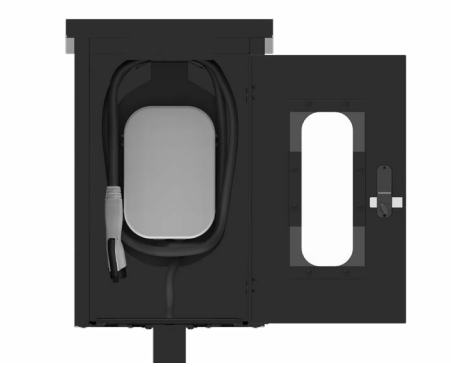
Featuring integrated cable management, a user-programmable lock, and support for wall or pedestal installations, Charger Armor delivers the security and convenience needed for both public and private charging locations.

FEATURES AND BENEFITS

- Protects EV chargers from theft, vandalism, and unauthorized access
- Universal mounting design accommodates most Level 1 and Level 2 charging units
- Blank faceplate supports a variety of charger mounting patterns for installation flexibility
- Seamlessly integrates with PLP's EV Charger Foundation for a complete charging station solution
- Integrated cable management keeps charging cables secure and organized when not in use
- User-programmable lock allows customized access control
- Maintains charger connectivity, enabling uninterrupted access to wireless data networks
- Supports wall-mounted and pedestal installations for maximum deployment flexibility

ADAPTABLE & VERSATILE

Built For Compatibility



- Supports wall-mounted and pedestal installations for maximum deployment flexibility
- Flexible faceplate accommodates a variety of charger mounting configurations
- Fast, straightforward installation
- Integrated cable management keeps charging cords secure, organized, and protected when not in use

Install Anywhere

- Seamlessly integrates with PLP's EV Charger Foundation (**Catalog Number: EVBASEASSY-200**)
- Existing concrete pads
- New concrete pours
- Wall-mounted installations

THE SECURE SOLUTION

- User-programmable lock allows customized access and security control
- Charge cable routing enables the enclosure to remain closed and locked while the EV is charging
- Impact-resistant viewing window provides quick visual access to charger status
