Clearance Measurement

Measure the unobstructed, clear opening dimensions of the compartment. Obstructions may include but are not limited to: doors, striker plates, chains weather strip, and any other items that may interfere with the door opening.

Dimension	Measurement
A Clear Door Opening Height	
B Clear Door Opening Width	
C Bottom Dimension*	
D Clear Inside Dimension	
E Notch Depth**	
F Notch Height**	
G Clear Inside Dimension (Notch)	

*Bottom dimension is used when a riser is required.

**Notch height and depth are for the notched option only.
