

FUEL & LUBE TRUCKS

OPTIMIZE YOUR OPERATIONS WITH **ONSITE SERVICE**

Stellar® Fuel & Lube Trucks Deliver Performance Where You Need It

**MAXIMIZE
OPERATIONAL
EFFICIENCY**

Stellar's comprehensive lineup of fuel and lube trucks and other mobile service equipment — formerly offered under the Elliott Machine Works name — allows you to perform refueling, lube services and preventive maintenance directly onsite, minimizing costly downtime. With customizable configurations and various sizes, these trucks enhance productivity whether you operate a few pieces of equipment or a large fleet.

Stellar fuel and lube trucks are used in a variety of industries, including:

- + Construction
- + Government & Municipalities
- + Mining & Aggregates

FUEL/LUBE TRUCKS

Engineered with precision, Stellar's Fuel & Lube Trucks are built to meet the specific demands of various applications — continuing the legacy of quality and reliability established under the Elliott name. Whether you need a single-axle truck for a small construction site or a robust unit designed for off-road mine duty, we tailor each design to ensure optimal performance. Features include enclosed hose reel cabinets, insulated and heated van bodies, individual product tanks, high-pressure wash systems and more.

Single-Axle Fuel/Lube Trucks

For conventional chassis under 33,000 lbs GVW, these units carry 1,000 to 1,250 gallons of fuel and oils in open-platform or enclosed designs.

Tandem-Axle Fuel/Lube Trucks

Designed for tandem-axle chassis over 56,000 lbs GVW, these units hold 2,000 to 2,500 gallons of fuel and fluids in various configurations.

Off-Road Fuel/Lube Trucks

Built for articulated dump trucks, these units carry 2,500 to 5,000 gallons of fuel in open or enclosed designs, available for factory or local installation.

Canada Spec Fuel/Lube Trucks

Designed for extreme climates, these insulated units meet DOT406 and TC406 standards for transporting fuel on Canadian highways.

FUEL TRUCKS

Stellar's Fuel Trucks are designed to meet stringent Department of Transportation safety standards, regardless of code requirements. The tanks come in steel, aluminum or stainless steel and include features such as delivery systems exceeding 150 gpm, electric-rewind hose reels, fuel recovery systems for downed machines, DEF and grease dispensing systems, and more.

Single-Axle Fuel Trucks

Designed for conventional chassis under CDL or 33,000 lbs GVW, these trucks carry 2,000 gallons of fuel and 100 gallons of DEF.

Tandem-Axle Fuel Trucks

Built for 60,000 lbs. GVW chassis, these trucks typically hold 3,000 to 4,500 gallons of fuel and DEF, with custom sizes available.

Fuel & Water Service Units

Used by paving contractors, these units dispense fuel and water into machinery and store road signs, providing a safer alternative to flatbeds.

Off-Road Fuel Trucks

Designed for mining applications, these trucks carry 4,000 to 6,000 gallons or more, mounted on durable off-road dump truck chassis.

Fuel your fleet with precision-engineered trucks. Scan now.

LUBE TRUCKS

Custom-built for a range of applications, from single-axle highway units to tandem-axle off-road mining models, Stellar's Lube Trucks are designed to fit your maintenance schedule perfectly. Each lube service unit showcases versatility with features such as enclosed reel cabinets, billboard-style side walls, insulated and heated enclosed bodies, individual oil tanks, ground fill and bulk load capabilities, and more.

Single-Axle Lube Trucks

Designed for conventional chassis under CDL or 33,000 lbs GVW, single-axle units are available in open-platform designs with enclosed reel cabinets or enclosed van bodies.

Tandem-Axle Lube Trucks

Built for conventional tandem-axle chassis with a GVW of 56,000 lbs or higher, tandem-axle units offer open-platform designs, sidewalls and options for enclosed reel cabinets or van bodies.

as your fleet. Scan now.

OFF-ROAD TRUCKS

Stellar's Articulated Fuel and Lube Trucks are engineered for durability in demanding off-road mining applications where conventional chassis fail. Our 5,000- and 6,000-gallon water trucks are built on off-road articulated dump truck chassis (wiggie wagons or ADTs) for optimal performance on rugged terrain.

Off-Road Fuel/Lube Trucks

Designed to haul fuel and oils, these trucks use a separate power unit or the truck's hydraulic system for operation. Full-frame design minimizes stress on the chassis.

Off-Road Fuel Trucks

Capacities range from 4,000 to 6,000 gallons or more. Tanks can be factory-installed or shipped for field installation.

Off-Road Water Trucks

Can be equipped with hydraulic spray heads or water cannons that are operated from the cab for efficient overhead spraying of conveyors or material piles.

COUNT ON STELLAR EQUIPMENT TO HELP YOU KEEP THE WORLD RUNNING

Our 100% employee-owned team partners with distributors to set the standard for quality, innovation and customer service, and we partner with customers to help them meet ever-evolving challenges to stay productive and profitable. **Together, We Are Stellar.**
