

FUEL & LUBE TRUCKS

OPTIMIZE YOUR OPERATIONS WITH ONSITE SERVICE

Elliott Fuel & Lube Trucks Deliver Performance Where You Need It

MAXIMIZE OPERATIONAL EFFICIENCY

Elliott Machine Works' comprehensive lineup of fuel and lube trucks and other mobile service equipment allows you to perform refueling, lube services and preventive maintenance directly onsite, minimizing costly downtime. With customizable configurations and various sizes, these trucks enhance productivity whether you operate a few pieces of equipment or a large fleet. Built for durability, each unit is now enhanced by the strength and support of Stellar.

TRUSTED EXCELLENCE SINCE 1948

Since 1948, Elliott has been a trusted manufacturer of mobile service equipment. In 2024, we proudly became part of Stellar, expanding our ability to serve customers across diverse markets with a commitment to quality and innovation.

Markets Served:

Mining
Oil & Gas
Rail
Site Excavation
Highway Construction
Military

FUEL + LUBE TRUCKS

Our Fuel & Lube Trucks are meticulously engineered to meet the specific demands of various applications. Whether you need a single axle truck for a small construction site or a robust unit designed for off-road mine duty, we tailor each design to ensure optimal performance. Features include enclosed hose reel cabinets, insulated and heated van bodies, individual product tanks, high-pressure wash systems and more.

Single Axle Fuel/Lube Trucks

For conventional chassis under 33,000 lbs GVW, these units carry 1,000 to 1,250 gallons of fuel and oils in open platform or enclosed designs.

Tandem Axle Fuel/Lube Trucks

Designed for tandem axle chassis over 56,000 lbs GVW, these units hold 2,000 to 2,500 gallons of fuel and fluids in various configurations.

Off-Road Fuel/Lube Trucks

Built for articulated dump trucks, these units carry 2,500 to 3,500 gallons of fuel in open or enclosed designs, available for factory or local installation.

Canadian Spec Fuel/Lube Trucks

Designed for extreme climates, these insulated units meet DOT406 and TC406 standards for transporting fuel on Canadian highways.

FUEL TRUCKS

Elliott Fuel Trucks are designed to meet stringent Department of Transportation safety standards, regardless of code requirements. Our tanks come in steel, aluminum or stainless steel and include features such as delivery systems exceeding 150 gpm, electric rewind hose reels, fuel recovery systems for downed machines, DEF and grease dispensing systems and more.

Single Axle Fuel Trucks

Designed for conventional under CDL or 33,000 lbs GVW, these trucks carry 2,000 gallons of fuel and 100 gallons of DEF.

Tandem Axle Fuel Trucks

Built for 60,000 lbs GVW chassis, these trucks typically hold 3,000 to 4,500 gallons of fuel and DEF, with custom sizes available.

Fuel Water Service Units

Used by paving contractors, these units dispense fuel and water into machinery and store road signs, providing a safer alternative to flatbeds.

Off-Road Fuel Trucks

Designed for mining applications, these trucks carry 4,000 to 6,000 gallons or more, mounted on durable off-road dump truck chassis.

LUBE TRUCKS

Our Lube Trucks are custom-built for various applications, from single axle highway units to tandem axle off-road mining models, ensuring they fit your maintenance schedule perfectly. Each lube service unit showcases versatility with features such as enclosed reel cabinets, billboard-style side walls, insulated and heated enclosed bodies, individual oil tanks, ground fill and bulk load capabilities and more.

Single Axle Lube Trucks

Designed for conventional chassis under CDL or 33,000 lbs GVW, single axle units are available in open platform designs with enclosed reel cabinets or enclosed van bodies.

Tandem Axle Lube Trucks

Built for conventional tandem axle chassis with a GVW of 42,000 lbs or higher, tandem axle units offer open platform designs, sidewalls and options for enclosed reel cabinets or van bodies.

OFF-ROAD TRUCKS

Elliott Articulated Fuel and Lube Trucks are engineered for durability in demanding off-road mining applications, where conventional chassis fail. Our 5,000- and 6,000-gallon water trucks are built on off-road articulated dump truck chassis (wobble wagons or ADTs) for optimal performance on rugged terrain.

Off-Road Fuel/Lube Trucks

Designed to haul fuel and oils, these trucks use a separate power unit or the truck's hydraulic system for operation. Full-frame design minimizes stress on the chassis.

Off-Road Fuel Trucks

Capacities range from 4,000 to 6,000 gallons or more. Tanks can be factory-installed or shipped for field installation.

Off-Road Water Trucks

Can be equipped with hydraulic spray heads or water cannons, operated from the cab for efficient overhead spraying of conveyors or material piles.
