### Things you should know:

- **LVR** stands for Loan to Value Ratio. It is the percentage of money you borrow for a home loan compared to the value of the property. If your LVR is greater than 80%, you will need to pay lenders mortgage insurance (LMI).
- **LMI** stands for Lenders Mortgage Insurance. Lenders Mortgage Insurance (LMI) is a one-off, non-refundable, non-transferrable premium that's added to your home loan. The more you contribute to the purchase price of your property, the lower the LMI cost will be.
- **IO** stands for Interest Only loan. An interest-only loan is a loan in which the borrower pays only the interest for some or all of the term, with the principal balance unchanged during the interest-only period.
- **P&I** stands for Principle and Interest loan. With a P&I loan, your repayments are divided up into two portions. Some is used to pay off the interest due on your outstanding loan amount, while the remainder goes towards paying off the outstanding loan amount itself.
