**Effective Date:** 5<sup>th</sup> December 2025

### Target Market Class of Consumers

#### Product Description and Key Attributes

Help to Buy is a Commonwealth shared equity scheme administered by Housing Australia. The shared equity contribution operates like a loan without standard repayments. It enables eligible Australians to purchase or build a home with an equity contribution from the government of up to:

- 40% for new homes, or
- 30% for existing homes

#### Key attributes:

- Buyers must occupy the property as their principal place of residence.
- Buyers must contribute a minimum deposit (at least 2%) and are expected to contribute the maximum amount they can reasonably afford toward the purchase, based on their financial situation.
- Buyers can voluntarily repay the government's equity contribution over time or upon sale.
- Buyers may be required to repay the government's equity contribution, in full or in part, where their financial capacity supports a repayment.
- No lender's mortgage insurance (LMI) is required at origination. Buyers may choose to pay LMI to facilitate the buy back of the Commonwealth Share during the life of the Scheme.
- The government retains a proportional equity interest in the property, until the equity is fully bought back.

#### Key Eligibility Requirements:

- Must not currently own property.
- Must meet maximum taxable income thresholds.
