## AquaTemp Submersible SDI-12 Temperature Sensor

## Overview

Sutron's AquaTemp submersible temperature sensor is a rugged SDI-12 sensor designed to measure temperature of water, soil, and other liquids. The SDI-12 interface, high accuracy, and long-term reliability makes it easy to add temperature monitoring to existing stations.

AquaTemp-x
(" $x$ " determines cable length)

## Applications

- Soil Temperature
- Streams
- Surface Water
- Stilling Wells
- Dams
- Aquaculture Tanks

## Features

- SDI-12 Operation (V1.3)
- Tough UV-resistant, watertight polyurethane cable
- Stainless steel body with eyelet for weight or pull strings
- Flex fitting to protect cable
- Wide operating temperature range $\left(-40^{\circ}\right.$ to $+60^{\circ} \mathrm{C}$ )

## Accuracy Comparison

AquaTemp Performance of 10 units $\left(-5^{\circ} \mathrm{C}\right.$ to $\left.+45^{\circ} \mathrm{C}\right)$

## Specifications

| SPEClifications subject to change without notice  |  |
| :--- | :--- |
| Measurement Interval | 1 second to 24 hours |
| Units | Celsius, Fahrenheit |
| High Accuracy Temperature Sensor | $\pm 0.1^{\circ} \mathrm{C}\left(-5\right.$ to $\left.+45^{\circ} \mathrm{C}\right)$ |
| Temperature Resolution | $0.01^{\circ} \mathrm{C}$ |
| Operating Range | -40 to $+60^{\circ} \mathrm{C}$ |
| Quiescent Current | $<0.1 \mathrm{~mA}$ |
| Active Current | $<5 \mathrm{~mA}$ |
| Input Voltage | $7-16 \mathrm{~V}$ |
| SDI-12 Operation | V 1.3 |
| Tough UV resistant polyurethane <br> cable with waterblock | 60 ft . standard |
| Diameter | 0.63 inch |
| Device is capable of fitting through a standard 1 inch conduit with 8 inch <br> factory bend corner |  |

## Models \& Options

## ORDERING

| Part Number |  |
| :--- | :--- |
| AquaTemp-x | AquaTemp Submersible <br> SDI-12 Temperature Sensor |
| Calibration Certificate | Optional add-on (Unit is calibrated with NIST <br> traceable equipment) |
| X in the part number represents the number of feet of cable needed: $60,100,150,200,300 ~ o r ~ a n y ~$ <br> custom size the application requires. It is not recommended to go beyond 300 feet. |  |

## Recommended Accessories

## SDI-12 Surge Protection Module (6461-1241)

Although the AquaTemp is built with SDI-12 surge protection, Sutron recommends additional security through the SDI-12 Surge Protection Module.

$$
\begin{array}{ll}
\text { •Multi-stage circuitry } & \text { Automatically resets } \\
\text { •Operating temperature } & -40^{\circ} \mathrm{C} \text { to }+60^{\circ} \mathrm{C} \\
\text {-Accepts wire sizes (input/output) } & 26-14 \mathrm{AWG} \\
\text { - Series resistance (Analog I/O) } & 100 \text { ohms } \\
\text {-Power handling } & (8 / 20 \mathrm{uS}) 20 \mathrm{kAmps} \\
\text {-Clamping voltage } & 36 \mathrm{~V}
\end{array}
$$

Automatically resets after surge
