# Enterprise Readiness

MongoDB's Professional Services team has the expertise to accelerate the success of your most important projects, driving success at all stages of application development and digital transformation with MongoDB. Our Application Lifecycle Expertise packages provide technical expertise at all phases of the application development lifecycle.

## Deliverables

A MongoDB Enterprise Readiness engagement includes delivery of the following documents:

- Upgrade plan document
- Management tooling deployment documentation
- Performance evaluation and tuning report

## Engagement Details

- A MongoDB Enterprise Readiness engagement is focused on a single MongoDB application.
- Consulting is delivered on site or remotely, by mutual agreement.
- The engagement includes 5 days of project management and 20 days of consulting in support of the above activities and deliverables.

Our Enterprise Readiness package is designed to help you take your deployment to the next level by leveraging MongoDB enterprise features, tooling, and best practices. A MongoDB project manager and consulting engineers will work with you and your team to provide expertise and assistance with developing your application, deploying your MongoDB cluster, management tooling, enterprise integrations, and upgrade planning and testing.

| Major Activities | | MongoDB Enterprise Readiness |
|---|---|:---:|
| **Project Planning** | Prepare a shared project management and implementation plan | ⊘ |
| **MongoDB Cluster** | Review MongoDB deployment configuration and performance metrics | ⊘ |
| | Assess application access patterns and opportunities for optimization | ⊘ |
| | Build/review capacity planning model | ⊘ |
| | Assess security configuration | ⊘ |
| | Support implementation of recommendations | ⊘ |
| **Management Tooling** | Install and configure MongoDB management tooling | ⊘ |
| | Assist with automation of operations | ⊘ |
| **Enterprise Integrations** | Install and configure MongoDB enterprise integrations | ⊘ |
| **Upgrade Planning & Testing** | Understand application usage of MongoDB features, and identify required application changes based on version compatibility | ⊘ |
| | Define app and cluster-specific upgrade plan | ⊘ |

This package includes critical development and operations activities for optimizing your MongoDB deployment and maximizing the benefits of MongoDB Enterprise.

# Resources

We are the MongoDB experts. Over 15,000 organizations rely on our commercial products. We offer software and services to make your life easier. For more information, please visit mongodb.com or contact us at sales@mongodb.com.

- Case studies
- Resource center
- Free online training
- Documentation
- MongoDB Stitch serverless platform
- MongoDB download
