

Scale

Meet the performance and growth demands of your application.

MongoDB Professional Services

Be confident that MongoDB can scale to match your business needs. Our team inspects your MongoDB environment and builds a focused plan to drive your application's scalability, availability and performance.

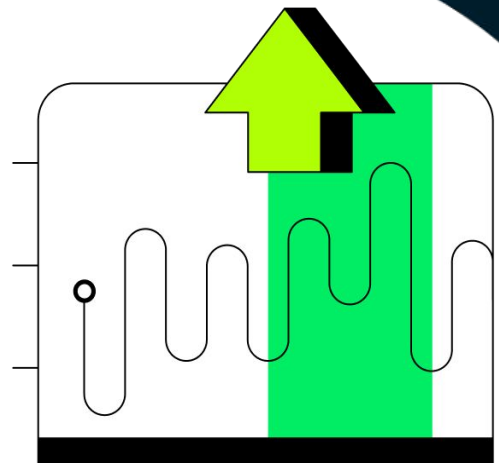

Overview

Bringing your MongoDB solution to production is only just the beginning. Now that your app is live, your focus shifts towards continuing to provide incredible user experiences as your business and application grow.

In a **Scale** engagement, our Professional Services team dives deep into your MongoDB deployment to develop a series of recommendations to enhance your environment.

We then share our findings with your key stakeholders along with an implementation plan—which our team can then **execute** for you.

After this engagement, your team will be equipped with a custom runbook, preparing them to design and maintain your MongoDB environment to handle whatever your business and users throw at it. With implementation services, you will walk away with an enhanced environment that meets the business goals and performance metrics our teams align on.

Scale Drivers

Growing user volumes

Better user experiences

Business expansion

New feature roll-out

Seasonal trends

Scale Engagements and Key Activities

MongoDB Professional Services can provide end-to-end support by building your Scale plan and executing it for you. If you just need up-front assistance with creating a robust plan for your team to execute, you can start with Scale Essentials.

		Scale	Scale Essentials
Alignment and planning	Align on business goals and target metrics through time-bound discovery and project planning workshops	✓	✓
Discovery and inspection	Comprehensive analysis of your MongoDB environment and team skills, including clusters, schema, access patterns, & more	✓	✓
Analysis and feedback	Key findings are presented through a “Performance & Scalability Report” and stakeholder review sessions	✓	✓
Implementation	Receive recommended actions, potential issues, and implementation strategies. Our team can also build a tailored implementation plan and execute it for you.	Recommendations, project plan and execution	Findings and recommendations report only
Long-term roadmap	During implementation, our team builds you a strategic Scale and Performance roadmap, as well as a Procedural Runbook to perform operational tasks going forward.	✓	X
Typical engagement duration		10 weeks	4 weeks
