

Control

Take control over the Total Cost of Ownership of your Atlas deployment.

MongoDB Professional Services

Get a rich understanding of your application's Atlas cost drivers. Our team inspects your MongoDB environment and builds a focused plan to drive cost transparency and predictability, and identify opportunities to reduce costs where possible.

Accelerate

Scale

Control

Sustain

Overview

As your organization's MongoDB footprint grows and matures, costs increasingly become an area of attention, whether your app has recently “scaled at all costs” or you're simply looking to refine your management of MongoDB.

With a **Control** engagement, our Professional Services team helps you better understand your Atlas utilization and the cost drivers that impact your financial spend—then identify and implement optimizations to address any inefficiencies.

After this engagement, you will be equipped to have full transparency over your Atlas costs and understand how to influence cost increases and decreases based on design and configuration optimization, as well as new feature implementation.

Your team will be equipped with a custom runbook, preparing them to manage costs for your MongoDB environment going forward.

Control Engagements and Key Activities

MongoDB Professional Services can provide end-to-end support by building your Control plan and executing it for you. If you just need up-front assistance with creating a robust plan for your team to execute, you can start with Control Essentials.

		Control	Control Essentials
Alignment and planning	Align on business goals and target metrics through time-bound discovery and project planning workshops	✓	✓
Discovery and inspection	Comprehensive analysis of your MongoDB environment and team skills, including clusters, schema, access patterns, & more	✓	✓
Analysis and feedback	Key findings are presented through a “Resource Utilization and Cost Control Report” and stakeholder review sessions	✓	✓
Implementation	Receive cost control recommendations and optimization strategies. Our team can also build a tailored implementation plan and execute it for you.	Recommendations, project plan and execution	Recommendations only
Long-term roadmap	During implementation, our team builds you a strategic Cost Control and Optimization roadmap, as well as a Procedural Runbook to manage costs and operational tasks going forward.	✓	X
Typical engagement duration		10 weeks	4 weeks
