

High-speed Non-contact Jet Dispenser

BEATRUM

Fast and precise Jetting
for viscous materials
ranging from low to high

Features

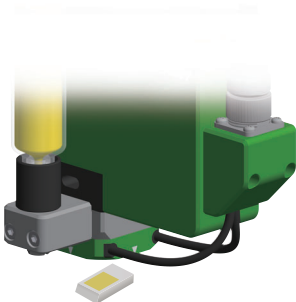

- Applicable for a wide viscosity range
- Lowest internal volume valve
- Various nozzle options
- Reduces bubbles in coating application
- Less maintenance with few wetted parts
- Stable dispensing up to 250Hz

		Dispensing valve	Dispensing controller
model		SJVH7000	SJVC7000
Size	W	53mm	250mm
	H	95mm	113mm
	D	106mm	188mm
Weight		650g	1800g
Speed		Up to 250Hz	
Min. dispensed width		φ0.3mm	
Power		VDC24 (AC100 ~ 240V adapter)	

Applications

Underfill, dam & fill, moisture-proof coating material, UV adhesive, grease, oil, silver paste, paint, ink, primer, solvent, etc.

LED phosphor

Acrylic two-component adhesive

Grease

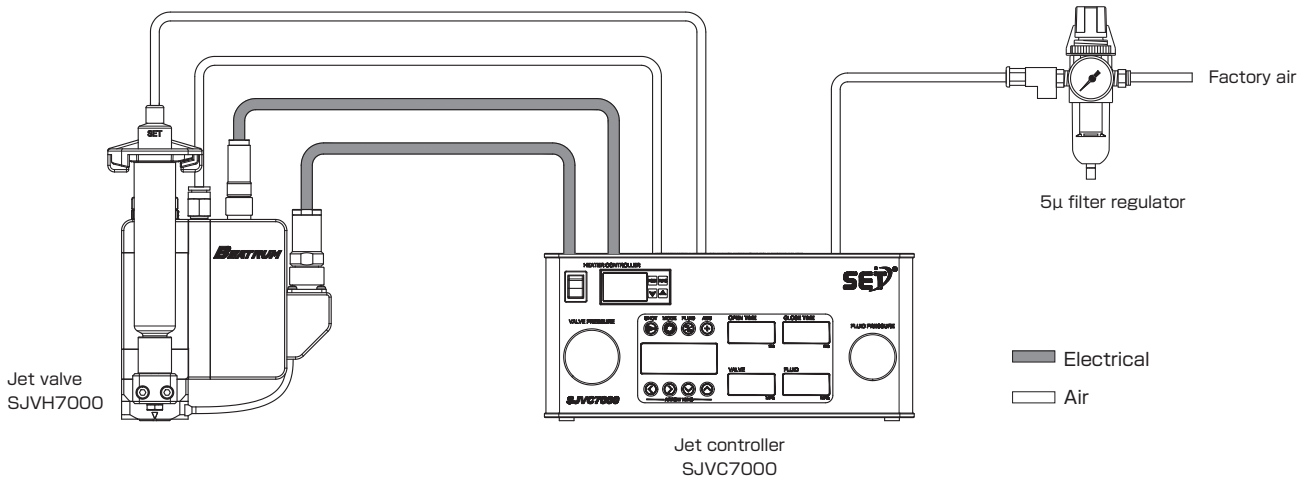

Dispense controller SJVC7000

SJVC7000, a compact controller fully equipped with functions required for critical jet dispensing

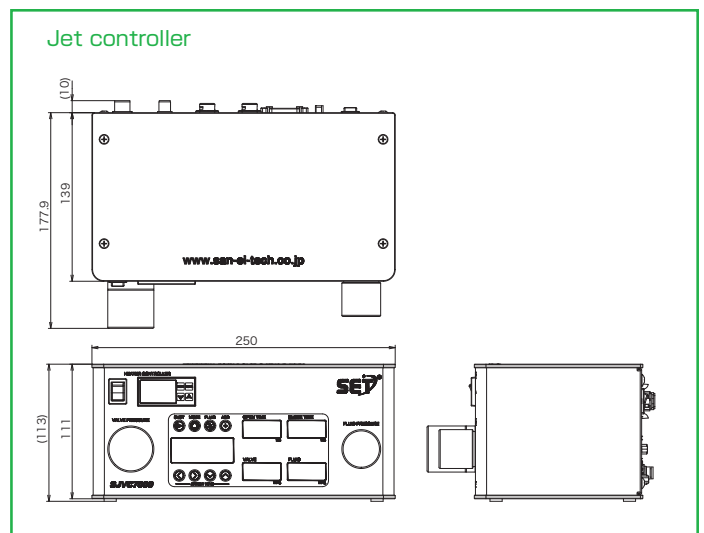

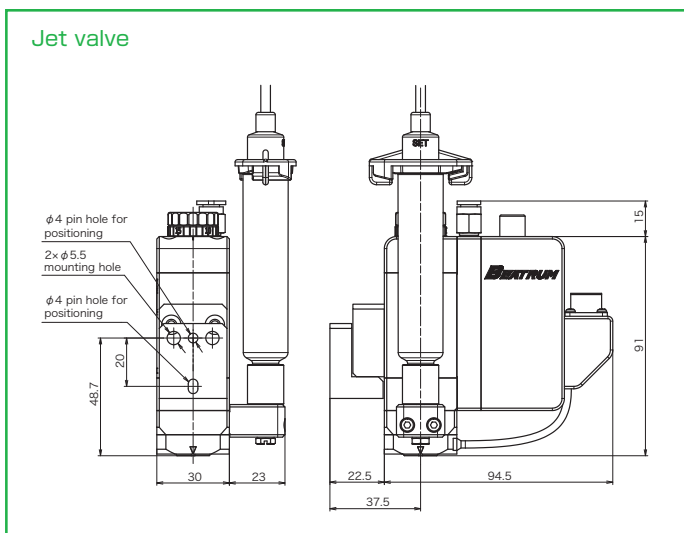

- Shot timer function
- Recipe storage
- External control
- Heater function
