

Clear Pressure Reservoirs

Type CT

Clear pressure reservoirs
For various simple applications

The CT series pressure tanks are see-through vessels designed to let the operators easily monitor fluid levels.

The tanks are made of stainless steel 303 and Acrylic or Toughened Glass tubes and can be pressurised up to 4 bars.

The choice of materials makes the CT series reservoirs compatible with a wide variety of fluids and applications and ensure that the contents do not corrode.

All models can also be fitted with air agitators, low level sensor and additional ports.

Technical data - Standard Pressure Reservoirs				
Type	500ML-CT*	2000ML-CT*	5000ML-CT*	1000CL-CT*
Max. working pressure (psi/bar)	60/4	60/4	60/4	60/4
Capacity (Litres)	0.5	2	5	10
Weight (kg)	2.20	6.2	6.8	7.3
Body Inner Diameter (mm)	65	150	150	190
Body Outer Diameter (mm)	75	160	160	200
Overall Height (mm)	272	248	388	448
Overall Width (mm)	209	166	166	206
Height without Lid (mm)	187	184	324	384

* Available in stainless steel 303 with Acrylic or Toughened Glass cylinder
