

Putnam 8 Charging Station™

Designed to charge, store and secure 8 iPad® devices.

Specs: 375 mm (L) x 311 mm (W) x 378 mm (H) | 11.3 kg

LocknCharge makes life easier.

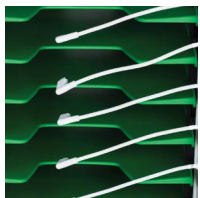

External Charging Status Display.

With the Putnam Charging Station, it's easy to see the charging status of each individual device—even from across the room. Each slot is tied to an external, LED back-lit number that shows if a device is charging (red), charged (green) or not plugged in/missing (no light). Genius!

Kiss Those Tangled Cords Goodbye.

It's virtually impossible to tangle the charging cables in the Putnam Charging Station. The cords are the just the right length to reach each device—no more, no less, no mess.

Setup is Easy Peasy. Putnam Charging Stations are pre-wired with 8 MFi-approved lightning cables for iPad devices. Just take the unit out of the box, program the lock, plug it in and start charging.

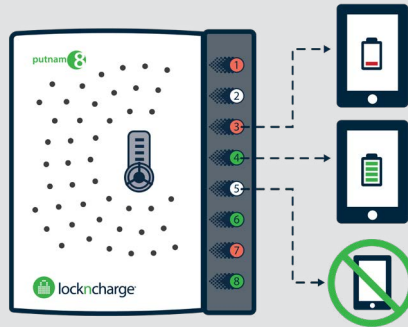

No Worries, No Keys! With an integrated mechanical combination lock, there are no keys to worry about. We've also included a master override key in case of forgotten combinations.

Worry-Free Workflow

Save Time by Sharing Responsibility.

By assigning numbered slots to every device user, each person can take ownership of plugging in their device. Plus, with the red and green charging status lights, it's easy to take care of any unplugged or missing device issues with minimal effort.

Charge Devices Overnight.

For organizations that choose to keep devices at school or work overnight, a charging station is a must-have. Feel confident that devices are accounted for at the end of the day, secured overnight, and charged up in the morning.

Additional Key Benefits

Efficient Charging. With 2.4 amp charging at each port, the Putnam Charging Station can charge devices simultaneously.

Case or No Case.¹ Slot dimensions are optimised to work with most cases and covers.

Itty Bitty Footprint. The Putnam only takes up as much desk space as a sheet of scrapbook paper. Now that's compact!

Safe Power Management. Once a device's charge goes from red to green, the Putnam stops charging. This ensures that devices are not overcharged, increasing their longevity.

Affordable. You don't have to sacrifice quality for affordability. This mobile device charging station is a budget-friendly option for charging devices with lightning connectors.

Wall Mountable. Putnam Charging Stations have an optional wall-mounting kit available (sold separately) that allows you to mount the unit directly to the wall.

Tough as Nails. Fully-welded steel construction and a built in mechanical combination lock make this charging station ultra secure. It's also backed by a robust warranty.*
