

Points of Difference

Carrier™ 30 Cart

Joey™ 30 Cart

Design

Similarities:

- Both Carts feature a top-loading design for easy access to devices.

Differences:

- The Carrier 30 is a heavy-duty, fully welded steel Cart with limited pry points. The Joey 30 features a lightweight, riveted design.
- The Carrier 30 Cart features adjustable shelves that can raise the height of the devices for easier access. The Joey 30 Cart features a "tool box" that lifts out for easy access to cabling below.

Flexibility

Similarities:

- Both Carts can flex with you. Easily mix and match Baskets and racks to meet your deployment needs.

Differences:

- The Carrier includes Baskets with wire racks available upon request. The Joey comes standard with Baskets and plastic divider racks.
- The Carrier 30 racks can accommodate devices up to 17" while the Joey 30 plastic racks can accommodate devices up to 15".

Security

Similarities:

- Both include quality padlocks and provide great security compared to competitive products.
- Both offer an optional lock-down kit, which can bolt the Cart to the ground or wall for additional security (sold separately).

Differences:

- The Carrier 30's heavy-duty steel construction is superior to the Joey riveted steel construction.
- The Carrier 30 includes a combination padlock. The Joey 30 includes a keyed steel padlock.

Cable & Power Management

Similarities:

- Both Carts are easy to wire with organized cables and hidden power bricks.

Differences:

- The Carrier features a rubber side channel that keeps cables snugly in place. The Joey features a "tool box" that lifts out for easy access to cabling below. Large, flat metal plates mount to the inside of the cart to keep cables in place.
- The Carrier features the ECO Safe™ Power Management System with an external charging display. The Joey features the ECO Smart Power Management System.
