Carrier 30 Specs: 934 mm (H) x 670 mm (W) x 737 mm (L) | 61.9 kg
Carrier 40 Specs: 934 mm (H) x 670 mm (W) x 855 mm (L) | 72.3 kg

LocknCharge makes life easier.

Top Loading Cart Design. Access from multiple sides at once allows for quicker distribution of devices, plus no more bending down to remove devices from a bottom shelf. Cabinet style carts can take 2-3 times longer to wire, and the removable panel in the bottom gives full access to power cords in one fell swoop. Your back and your sanity will thank you.

Organised Cables and Hidden Bricks. Minimise Cart clutter by keeping cables secure once and for all. Cables stay organised in the unique side channel, allowing you to plug in devices quickly after each use. Power bricks are stored in the bottom of the Cart, making sure they don't sprout legs and wander off.

Baskets by LocknCharge. These aren't your typical picnic baskets. Slotted device Baskets by LocknCharge make device deployments faster, safer and more efficient.

External Charging Status Display. Most of us don't have x-ray vision—but with our Carrier Carts, it's super easy to know the charging status of your devices through the external ECO Safe Charge™ display.

Smarter Workflow

Save Time, Save Money. Our goal is to save you valuable time, each and every day, thus putting money back towards your bottom line. Our Baskets enable hand-out and pack-up devices in less time, allowing you to forget about charging and focus on your goals.

Perfect for Shared Use. Not enough devices to go around? No problem. You can now easily share a small handful or a whole cartload of mobile devices between multiple areas without the fuss. When teamed up with our Baskets, our easy-to-maneuver Carts allow you to transport mobile devices quickly, safely and easily.

Additional Key Benefits

Compatible & Efficient.¹ Larger devices never have to feel left out. Carrier Carts can accommodate and charge 20, 30 or 40 of almost any device, with or without cases.

Top Sliding Lid Doubles as Work Surface. The secure lid can be used as a work surface in space-strapped rooms.

Safe Power Management. Never blow a fuse again. ECO Safe Charge™ handles power requirements of almost any device by staging the availability of power. Plus, it ensures that devices are not overcharged, increasing their longevity.

Tough as Nails. Carrier Carts are made with high-quality, welded steel and are backed by a robust warranty.

Secure. Protect your device investment without worry. Lock away devices in the storage area with a padlock. An optional anchor kit locks the whole Cart to the floor.

Future-Proof. Think inside the box, and you won't be stuck with a bunch of outdated Carts. Removable racks and Baskets allow this Cart to adapt to future needs as devices change or new technology is added.

External power outlet. With an external power outlet you can easily charge devices like a projector or other peripherals.

No Keys to Worry About. Our Carrier Cart comes with a high-quality, combination padlock.
