

Smart Charging Lockers Eliminate Device Downtime for Students at Los Angeles Unified School District

Mobile devices are critical to education, but when a student or teacher doesn't have a working device, it can halt learning. Addressing the effects of device downtime is no longer optional, and forward-thinking schools like Los Angeles Unified School District are getting students back to learning faster by implementing Smart Charging Lockers from LocknCharge.

LAUSD UNIFIED Smart Locker Project Overview

PHASE 1: ROLL OUT

1,800 FUYL Units	1.5 YRS Time frame	\$22M Investment
---------------------	-----------------------	---------------------

What started as an idea to solve device management during school shutdowns has evolved into an in-person and remote learning program that will reduce device downtime caused by lost, forgotten or broken mobile devices.

"Device downtime means less classroom instruction, and the students lose valuable class learning experience," said Phillip Lucero, Senior IT Business Efficiency Analyst at LAUSD.

LAUSD, the second largest system in the US, turned to LocknCharge to provide students and educators with access to ready-to-use devices anytime they're needed. As part of their phase 1 roll-out, the District is deploying 1,800 LocknCharge FUYL Tower™ 15's across all of their school sites.

The District's Department of Information Technology and their technology reseller partner worked with LocknCharge's Strategic Account Executive, Vince O'Rourke, to fulfill their \$22M investment. Together, the three partners devised a successful deployment plan to deliver, configure and install 300 Towers each quarter over the 2022-2023 school years.

"After vetting different vendors and companies, we felt that LocknCharge was the best fit and product option for the district. Once we started working with Vince from LocknCharge, it was clear we picked the right company and product for LAUSD." – Phillip Lucero, Senior IT Business Efficiency Analyst at LAUSD

Smart Lockers save schools time and money by automating loaner programs, providing students with self-service devices, and ensuring device accountability. Students at LAUSD will get back to learning faster while also affording IT team members and faculty more time to focus on impactful, strategic projects.

FUYL Tower™ Highlights

Flexible, Multi-Use System: Used for broken device exchanges or check-in/out programs

Centralized, Web-Based Portal: Admins can view and manage all Towers remotely from one portal

Contactless Device Exchanges: 24/7/365 access to devices saves time for students, teachers and IT

Device Accountability: Tower activity is tracked in the Cloud's event log, reducing breakage and loss

Roster Management: Manage end users with the internal directory, via an LDAP-compatible directory such as Active Directory or through a native integration to Google's directory services

Help Desk Integration: Easily integrate the Cloud with systems like Incident IQ and One2One Manager for end-to-end device management

Secure: Data integrity, physical and network security, and resiliency are a top priority

Robust Warranty: Should any issues arise, FUYL Towers are backed by a robust warranty on the main frame, electrical and all other components*

World-Class Customer Service and Support: Our knowledgeable, friendly team promptly assists with any questions or issues that may arise
