# One System. Limitless Impact.

➜ Save up to **80% of daily IT time** spent on device issues

➜ Trusted by top brands including **Apple, Dell, and CDW**

➜ Trusted by over **26,000 organizations** in 20+ countries

The Only Locker System Built for Real IT Workflows

Repairs

Users report issues and drop off faulty devices directly into a bay. IT is notified automatically, with full tracking and resolution logs.

Loaning

Forgotten device? No problem. Users check out a preassigned device and get back to work in seconds — without waiting for IT.

Deployments

Remotely assign new devices to users and let them pick them up on their own time. Ideal for onboarding, refresh cycles, or summer rollouts.

Charging

Assign users to self-serve charging bays with built-in, tamper-proof USB-C PD cables (36W). Devices stay secure, charged, and ready to go.

Fully Self-Serve. End users access devices on their own through a built-in touchscreen Kiosk — no staff required. Checkouts, returns, repairs, and deployments can all happen in under a minute.

Remote-First by Design. Support users in any location. Configure access, monitor usage, and resolve issues without being on site — ideal for remote IT teams or organizations with multiple locations.

Out-of-the-Box Simplicity. From unboxing to go-live, FUYL Smart Locker System is designed to be simple. Setup takes hours (not weeks) and onboarding a tower is as easy as connecting to Wi-Fi, signing into the Portal, and setting up workflows.

Always Accountable. With identity-based access, real-time visibility, and detailed audit trails, IT teams stay in control of who accessed what, when, and why.

Choose **Enhanced** for built-in workflows, or **Classic** for flexible, manual setup.

ENHANCED	CLASSIC
Exclusive technologies Includes access to the FUYL Kiosk, FUYL Portal, and smart, pre-configured workflows — no extra tools needed.	**Open integration capabilities** Supports open API and webhooks, giving you the freedom to build custom automations and integrations tailored to your environment.

➜ Available in 5, 8, 15, and 23 bay configurations.

➜ Onboarding and customer support are part of every subscription.

➜ From small teams to large-scale enterprises, FUYL fits seamlessly into any organization.
