

Quick start guide

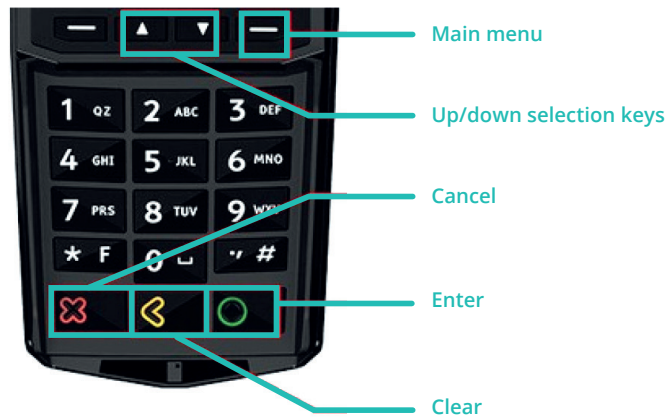

Desk Lane 3000 Kiosk

What's in the box?

1. Card Terminal
2. Terminal cable
3. Power supply unit
4. Window decal

Function keys

- **Menu** – Use this button to access the main functions menu on the terminal
- **Cancel** – Use this button to cancel and revert back to the previous screen
- **Clear** – Use this button to clear back or delete characters when keying in text/numbers
- **Enter** – Use this button to confirm selection on the terminal

Getting started

Connect the terminal cable to the Lane 3000 Kiosk terminal by connecting the HDMI end to the back, as shown.

Connect the power supply to the terminal cable, and connect to an active Ethernet port. **Note:** the Ethernet extension block and additional cable can be used to extend the cable if required.

Setting a static IP address on the terminal

When the terminal is configured, the menu buttons are disabled on the device.

To access the Admin Menu, please follow these steps:

1. After reboot, press "F" key followed by "654123" and the "F" key again.
2. The terminal will request an administrator password which is "123456" and "ENTER".

You are now in the Admin Menu. Using the up/down keys, select “ETH Setting”, and then press “ENTER”.

“Speed Change” appears on screen, select “Link Speed 100Mb/s” and press “ENTER”.

“Protocol Change” will then appear on screen, press the RED button (Cancel).

You can now set the terminal to the desired IP Address. Use the YELLOW button to clear the existing IP Address, and key in the new IP Address you wish to use. Press “ENTER” button to save the changes.

The next screen will display the Subnet Mask, this should not be changed. Press “ENTER”.

The final screen displays the Gateway IP Address, again this should not need to be changed. Press “ENTER”.

Terminal will request to save changes, press “ENTER”. Terminal will reboot and the new IP Address will be set.

The Terminal is now set up with the specified IP Address and ready for integration.
