

Insurance-Funded Speech Devices

How AbleNet helps districts save time, budget, and resources — while students get the speech device they need.

Every year, districts spend thousands of dollars purchasing AAC devices and app licenses outright—only to manage the repairs, replacements, and support that come with them. **There's a better way.**

AbleNet partners with school districts across the country to equip speech-language pathologists with a clear path to get students the **QuickTalker Freestyle speech device**, at no cost to the district, by funding through medical insurance.

Many families of students who use AAC may already have medical insurance that covers a dedicated speech device—they just don't know it. AbleNet helps school districts connect those families to that benefit, so students can access **a personalized speech device without drawing from district funds.**

Your students get what they need. Your budget stays intact. And your team gets to focus on what matters most: outcomes.

HOW IT WORKS

For Your District

- No cost to the district
- No IT setup, configuration, or troubleshooting from your team
- iPads freed up for other classroom uses
- 5-year unlimited warranty via ableCARE with no liability or repair costs passed on to the district
- Reduced AAC app license costs
- Access to any AAC app on the Apple App Store
- SLP clinical support available on demand through AbleNet's SLP Empowerment Team
- AbleNet handles all insurance paperwork—your SLP identifies the fit and submits the evaluation. We handle the rest.

For Families

- AbleNet checks the family's insurance—often same-day—to see if a speech device is covered
- Families can try the QuickTalker Freestyle speech device at home or in school through ableEXPERIENCE, with no commitment required
- If it's a good fit and covered, AbleNet manages all documentation and approval
- The device belongs to the student—backed by a 5year unlimited warranty
- Typically no cost to the family

AbleNet follows regulations outlined by different regulatory bodies worldwide to ensure our products are safe, abide by local laws and regulations, and privacy is honored.

The Bottom Line

When your district partners with AbleNet:

- ✓ Students get dedicated, customized speech devices at no cost to your district
- ✓ Your IT and AT teams are free from device management responsibilities
- ✓ Every device is protected for 5 years with unlimited repairs and replacements
- ✓ Your SLPs get clinical backup and on-demand support from experienced peers
- ✓ Your budget stays intact — and your iPads stay available for other students

Let the conversation begin.
