

Next Step Project Management

Step into the next stage of AAC with confidence! AbleNet Next Step Project Management connects SLPs with a dedicated project manager to guide them in the process of getting a hands-on ableEXPERIENCE for each of their clients.

Over a 90-day project, a project manager:

- Connects with you regularly to discuss your caseload and identify clients ready for AAC
- Defines an efficient path to access the ableEXPERIENCE
- Builds your confidence of AAC funding through your experience

By the end of a project, SLPs will be fully empowered in independent use of AAC funding to support their clients

How it Works

1. Getting Started

- Work with Project Manager to identify you AAC caseload.
- SLPs confirm caregivers' readiness for the ableEXPERIENCE.
- Complete benefit checks to access the ableEXPERIENCE - to get hands-on with an AAC device in as fast as two days!

2. Mid-Project Momentum

- Stay on track with dedicated 15-minute strategy sessions to maintain progress and confidence.
- Ongoing review of your growing AAC caseload to enhance your communication outcomes.
- Continue building your expertise with ongoing education and experience through the duration of your project!

3. Project Completion, and BEYOND

- Finish your 90-day project with confidence by mastering AbleNet's funding workflow and delivering client-centered AAC solutions.
- Continue the AAC funding journey with future individuals that could benefit from an ableEXPERIENCE.
- Keep growing with your impact and success by leveraging AbleNet's services to support all your AAC needs.
