

Compatibility Guide for x-to-water Heat Pumps

Find out which tado° Line X product is compatible with your heating system. Download the latest version of this document at tado.com/heat-pump-compatibility.

General

- You will receive specific DIY instructions, tailor-made for your heating system via the tado° app. Check your "Get Started" leaflet.
- Generic installation manuals for professional installers can be found on tado.com/professional-manuals.

Our Heat Pump Products

The Heat Pump Optimizer X

The Heat Pump Optimizer X enhances ease of use by managing the heating and hot water schedules through the tado° app with real-time consumption.

The Smart Thermostat X

Designed for use as a room thermostat, it can also be wired to a heat pump using a relay or OpenTherm communication.

? Your setup is compatible with the Heat Pump Optimizer X and the Smart Thermostat X and you want to know which one fits your needs?

The Heat Pump Optimizer X has been engineered to seamlessly complement a heat pump setup while providing smart enhancements. It is independent from any room and acts as a central heating device by giving you user-friendly access to your heat pump schedule(s) from the tado° app. The Heat Pump Optimizer X brings additional benefits to your setup when adding Smart Radiator Thermostat(s) X / Smart Thermostat(s) X to your radiators/underfloor heatings. Make sure to visit the Heat Pump Optimizer X product page for more details.

The Smart Thermostat X has been designed to be used as a room thermostat. Your heat pump operation will therefore react to that specific room schedule and current temperature.

Compatibility Guide for the Heat Pump Optimizer X

By using the native BUS communication we ensure a performance tailored to each heat pump's specificities.

Heat Pump Brand	Model	tado° Compatibility
 Atlantic	Alfea models (except Alfea M models and Alfea Excellia S)	✓

	Following models with VRC 470:	
	geoTherm ../x (other than VWL ../4)	

Compatibility Guide for the Smart Thermostat X

The Smart Thermostat X is compatible with 95% of heat pumps. It replaces a heat pump thermostat that has been wired with Relay control or using OpenTherm as a communication protocol.

Please check the tado° compatibility checker for additional details regarding your thermostat compatibility.

Do you have an air-air heat pump/air conditioner? The Smart AC Control V3+*

Controls air conditioners / heat pumps with an infrared remote control with a display to ensure a comfortable and healthy climate at home, while helping to save on your energy bill.

Check this [help center article](#) for more details.

**This product cannot be added in the same tado° home as Line X devices.*
