

MCA | CNS Implementation Services

MCA Professional Services

For over 25 years, the CNS team within MCA has enabled thousands of organizations in the public and private sectors to benefit from secure wireless communication technologies, improving operational productivity and efficiency. We offer a wide array of secure wireless communication products from various industry leading manufacturers, providing solutions for highly available, mission-critical communications between critical assets from local offices to remote/mobile field locations. MCA serves the nation's critical infrastructure by creating secure communication networks that pass data wirelessly between key systems linking remote personnel and machine assets. We sell, design, configure, and install cellular wireless (LoRaWAN/4G/5G/PLTE) data communications hardware and software, providing industry targeted IIoT connectivity solutions to fit our clients' exacting needs.

Our Engineering Services team provides Implementation Services to design critical wireless-based infrastructure solutions to address customers' business and technical requirements, as well as operational objectives.

Service Description | Network Implementation

Our CNS team delivers solutions, tailored to customer needs, which are executed based on an evolving set of best practices and project management processes and methodologies. These solutions are delivered within the context of a structured project, defined by a Statement of Work (SOW) and a comprehensive Project Plan.

Project management is an integral part of solution delivery, guiding customers, partners and third-party developers through the project execution process. The project is defined and scoped, with regular project review calls and/or project update reports.

Our Engineering Services team incorporates vast knowledge and skills relevant to fixed and mobile communications, with more than 30 years of experience in the industry. Our implementation services ensure successful delivery of your complex networking projects.

Featured Benefit | "Assured Success"

IT projects can be quite challenging to implement in a timely manner while still achieving business objectives. This is made even more relevant when considering your complex wireless-based communications project, due to the challenges around wireless networking, carrier coverage, and network security requirements.

Purchasing implementation services from MCA, based on a well-defined SOW, provides the assurance of a successful implementation project. The SOW represents a contract to deliver the agreed-upon solution. The CNS experts within MCA are here to deliver the solutions you need for your mobile communications initiatives.

Service Benefits

- "Assured Success"
- Turnkey implementation
- Solution Knowledge Transfer
- Best Practices

About Our CNS Team

- Founded in 1996
