

Safe Hospitals | Critical Inventory Theft

How Can You Protect Vital Assets and Inventory?

Every hospital, medical center, and specialized clinic houses expensive equipment, costly materials, and federally regulated substances that must be protected against theft.

Operational View

Detect

ACCESS CONTROL BREACH RECOGNIZED

Immediately upon breach, an alert is sent to security teams regarding the forced entry detected within your secure storage areas.

Analyze

APPEARANCE CAPTURED

Relevant cameras instantly pull-up feeds of the identified intruder constantly tracking them throughout facility using their appearance.

Communicate

NOTIFICATION COMMUNICATED

Image and location of individual sent as alert across radios and smartphones for security to monitor all hospital exits in proximity to the breached area.

Respond

FIRST RESPONSE DISPATCHED

Local police directly alerted with video for situational awareness and incident logged with pre-populated fields and relevant data.
