

# Safe Hospitals | Perimeter Alert

## How Can You Help Keep Your Patients and Staff Safe?

Ex-employees, abusive family members, and other people known to be trouble may have dark intentions towards patients or staff. We help you identify them before they have a chance to act.

### Operational View

#### Detect

##### LICENSE PLATE RECOGNIZED

An employee's ex-spouse with a history of violence detected entering hospital grounds using automatic license plate recognition (ALPR).

#### Analyze

##### APPEARANCE CAPTURED AND FLAGGED

The intruder is automatically flagged as being on a watch list and security is notified every time the intruder comes into view of a camera.

#### Communicate

##### NOTIFICATION COMMUNICATED

Alert automatically sent across security teams and nearest security resources dispatched with location and images of an unwelcome individual.

#### Respond

##### FIRST RESPONSE DISPATCHED

Local police directly alerted with video for situational awareness and incident logged with pre-populated fields and relevant data.
