

Transportation Facilities

Meeting the demands of complex shipping and warehousing operations requires the secure and reliable technology solutions MCA provides.

Improving Transit Safety and Security with MCA

In the United States, the public transportation industry employs almost half a million people, encompasses nearly 7,000 separate organizations, and makes 34 million daily journeys. Meanwhile, in New York City alone, private taxi operators shuttle over 240 million passengers per year to their destinations. And these figures continue to grow year over year.

With an ever growing number of passengers, the transportation industry needs reliable, secure solutions to keep passengers and staff safe, fleets maintained and running, resources connected and available, and routes and services on time. MCA has the solutions to help your team meet demanding schedules, track fleet assets, and maintain elevated security and customer service with our purpose-built and carefully curated communications product and service offerings.

Streamlining Communications to Create Safe, Reliable, and Connected Transit Systems

Designed to drive productivity and increase operational efficiency by opening clear lines of communication, our various radio, networking, and surveillance selections are guaranteed to provide your transit agency with the right fit.

Our cutting-edge surveillance ecosystems help you detect, verify, and respond to critical incidents in real-time to provide unmatched situational awareness.

Your entire fleet of buses, trains, ferries, and planes can have reliable, secure internet and data connectivity with our robust mobile networking solutions.

Transmit and receive communications privately and securely throughout your entire facility with an infrastructure powered by Nokia's DAC.

Customizable two-way radio solutions ensure that your workforce is constantly and reliably connected from anywhere with just a touch of a button.

Professional Services

We offer engineering services, project managers, system managers, and FCC Licensing to provide you with a full service team for the successful design, deployment and life-cycle support of your project.

Installation Services

From radio site development, staging and testing, and system development to installing aftermarket and OEM equipment to fleet vehicles, MCA has a devoted certified technical staff to meet your needs.

Solution Support

Our team provides full-service maintenance, repair and managed solutions services. Our dedicated support staff can manage your customized solutions — allowing you more time to focus on your business.

Rental Services

Many of our products are available via customer-friendly short and long-term rental programs. Our easy-to-use and personalized rental service helps meet your evolving communications and technology requirements.

Radio Solutions

MotoTRBO Radios and Rentals

Connect instantly from central dispatch to drivers and maintenance personnel with radio systems designed to meet your specific needs and coverage area.

MotoTRBO and PTX Accessories

Ensure clear communication with the right accessories, including speaker microphones, earpieces, and noise cancelling headsets for improved audio and reception.

Wave OnCloud PTX

Connect teams at the push of a button across different networks and devices, including phones, tablets, computers, and two-way radios.

Wave PTX Dispatch

CAD integrated with GIS and AVL can eliminate the needless headaches and hassle of routing and rerouting transport and maintenance vehicles.

Data Solutions

Outdoor Microwave Backhaul

Enjoy a modernized communication system with greater network capacity, speeds, and flexibility for railway systems spanning wide geographic areas.

IP-MPLS Routing

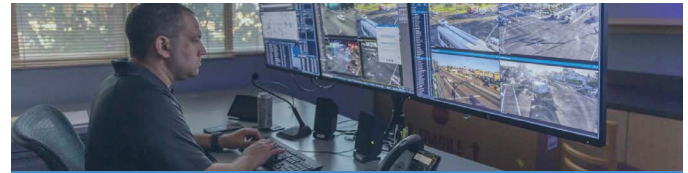

Ensure your airways, railways, and highways communications are always online with increased network availability and a lower TCO.

Cellular Networking

High-performance 4G and 5G cellular routers ensure your DOT's toll collectors, traffic lights, digital signage, and ALPR cameras are always connected.

Private Wireless (4G, 5G, & CBRS)

Get the connectivity you need to transmit and receive private and secure voice, data, and video communications throughout your air, rail, and bus transit hubs.

Security Solutions

Video Surveillance

Protect your facilities and public roadways with intelligent video cameras with integrated AI capabilities like automatic license plate readers.

Detection Systems

Our detection systems monitor your facilities for break-ins, trespassers, access to restricted areas, and concealed weapons.

Access Control Systems

Our state-of-the-art access control systems with card readers, RFID scanners, and biometric capabilities help keep your vehicle and equipment yards safe.

Integrated Solutions

Orchestrate creates a single pane of glass view to integrate all of your security and radio systems seamlessly for easy operation.

Fleet Solutions

Vehicle Area Networks

Our purpose-built 5G vehicle routers enable real-time mobile data connectivity for GPS, CAD, AVL, PTC, Video Surveillance, and more through extended Wi-Fi.

Private and Public Wi-Fi

Create separate Wi-Fi networks within your transit vehicles — private for ticketing and automated video offload systems and public for passenger usage.

Vehicle Video Systems

Smart cameras and analytics systems provide safety, security, and a second set of eyes for monitoring behavior and counting passengers.

Mobile Radio Systems

Ensure drivers are able to communicate with each other and central dispatch via purpose-built secure, reliable, and connected mobile radio systems.
