Avtec Scout

Dispatch Communications for Public Safety

Why Avtec Scout?

For more than 40 years, Avtec has provided mission-critical radio dispatch technology for nearly every aspect of the public safety industry, ranging from individual cities and counties to regional and statewide networks. With the long lifespan and software-based Scout™ system, Avtec continues its legacy of providing proven, trusted, and reliable solutions to clients around the world.

Every second is critical to the safety and success of your emergency response teams. Your dispatchers need to remain consistently connected to first responders, regardless of the voice technologies you use in your command center or out in the field.

Thousands of first responders and dispatchers rely on the flexibility of Avtec's radio dispatch solutions and depend on Avtec's commitment to open standards for the freedom to build a best of breed solution that meets their mission critical needs.

Proven

Rigorously tested and designed with a redundant architecture to ensure reliability in every mission-critical situation.

Scalable

Effortlessly add capacity and capabilities. Scout's single code based platform makes migration simple and seamless, regardless of the size of your dispatch operations.

Configurable

Replicate a legacy screen or adjust it to meet new workflow demands with a configurable experience that increases efficiencies and helps to minimize errors.

Interoperability

The ability to share real-time information between and among agencies during emergency situations affects response times and impacts the safety of the public and your first responders.

Avtec Scout's vendor-agnostic platform ensures your dispatchers have:

- Integration with leading public safety technology and tools, from P25 radios to National Emergency Number Association (NENA) headsets.
- Mission-critical interoperability and resource sharing capabilities necessary to respond within regional and statewide networks.
- Future-proofed platform with ongoing software updates, preparing you for initiatives such as Next Gen 911 and FirstNet.
- Ability to transmit radio site communications from remote locations directly to Avtec Scout consoles.

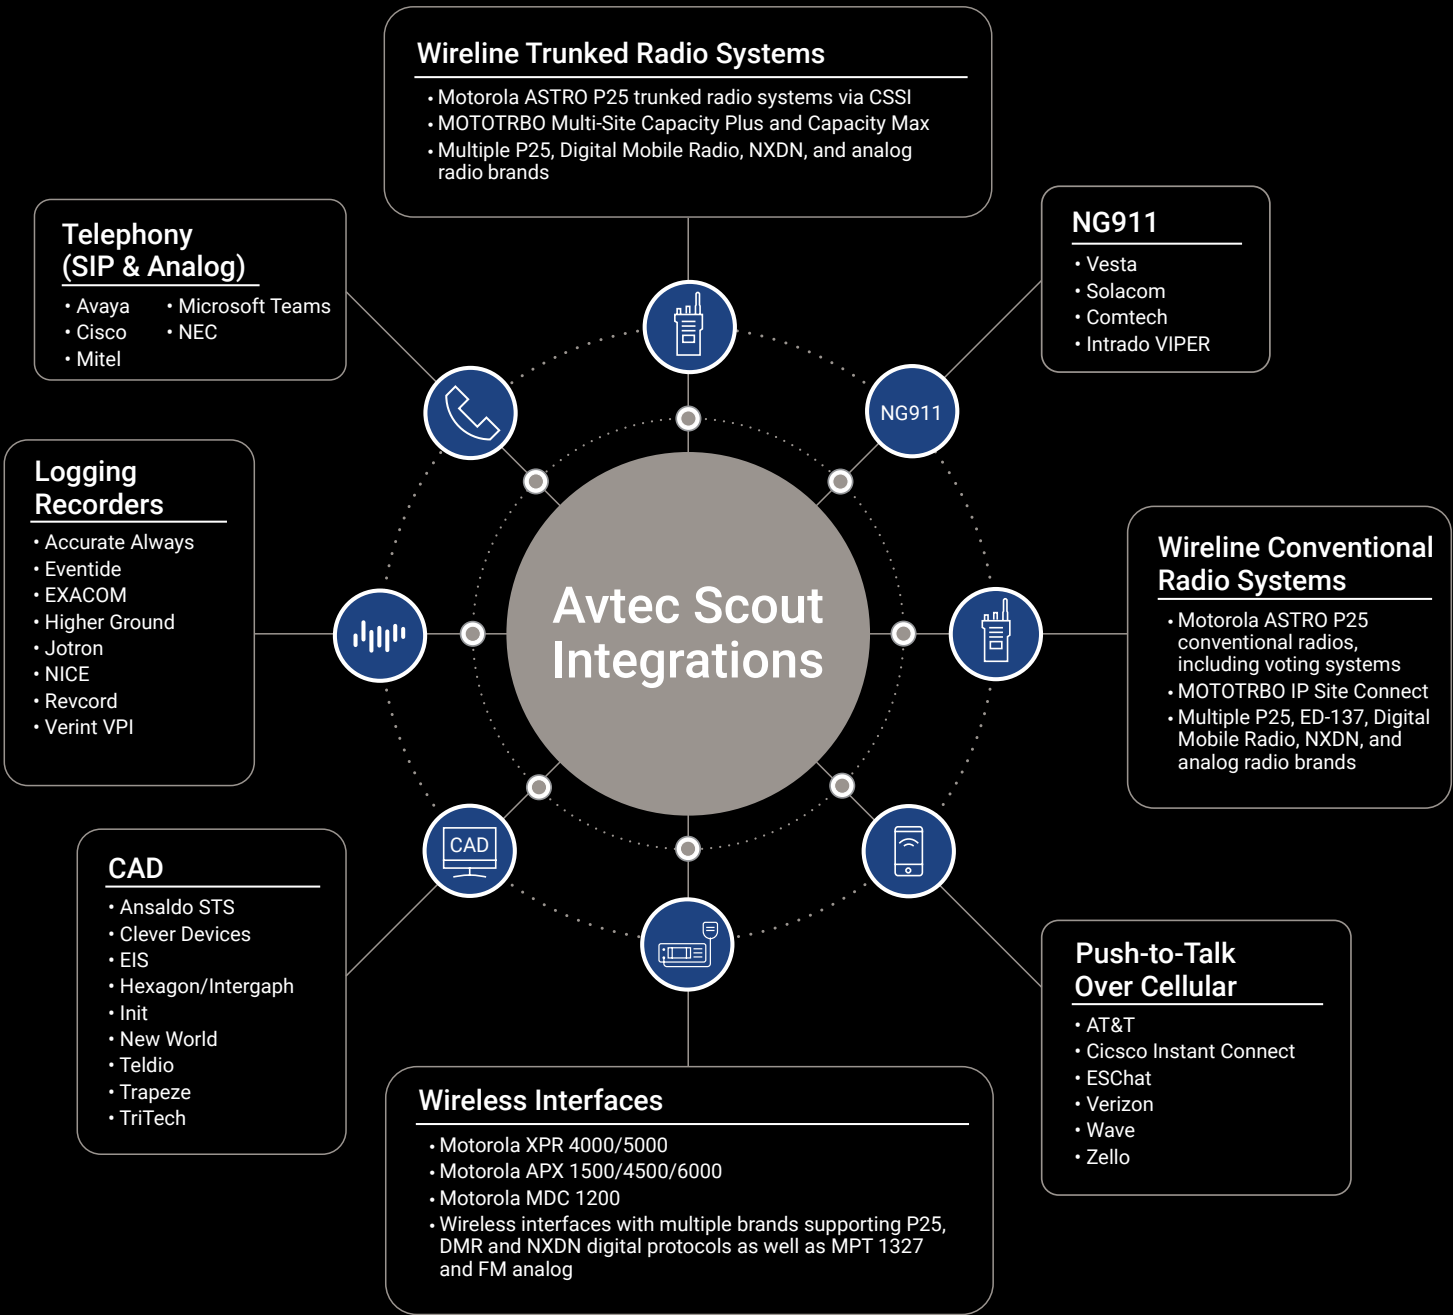

The Avtec Scout console integrates with many technologies relied upon by public safety agencies – including legacy and next-generation radio, telephony, recording, and broadband/LTE technologies. With Avtec, you get the flexibility to build a best-of-breed solution to meet the mission-critical communications challenges of today, tomorrow, and beyond.

Avtec ScoutCare Plus

ScoutCare Plus™ provides post-warranty software and hardware maintenance for your system. It includes the latest features, updates, security patches and bug fixes, as well as training and U.S.-based 24/7/365 technical support.

“With Scout and the P25 CSSI, we have a dynamic system that is flexible and customizable. The interoperability we have across our region gives us more depth and responsiveness.”

- John Krok, South Bay Regional Public Communications Authority, Southern California

The Avtec Advantage

Choose your equipment

Avtec Scout can run on commercial-off-the-shelf (COTS) PCs and use standard USB peripherals or Avtec's professional USB audio peripherals, making it easy to meet your organization's exact IT procurement and maintenance requirements.

Exceptional audio quality

Ensure first responders have the right information before arriving at the scene with clear and consistent audio quality.

Training

Avtec's robust training program gives your team the knowledge and confidence to fully maximize your investment.

Security

Avtec is committed to providing ongoing updates that include the latest security patches and features to address ongoing cyber threats.

Dispatch from anywhere

Deploy your system to meet all of your dispatch needs, including fixed, remote and mobile configurations.

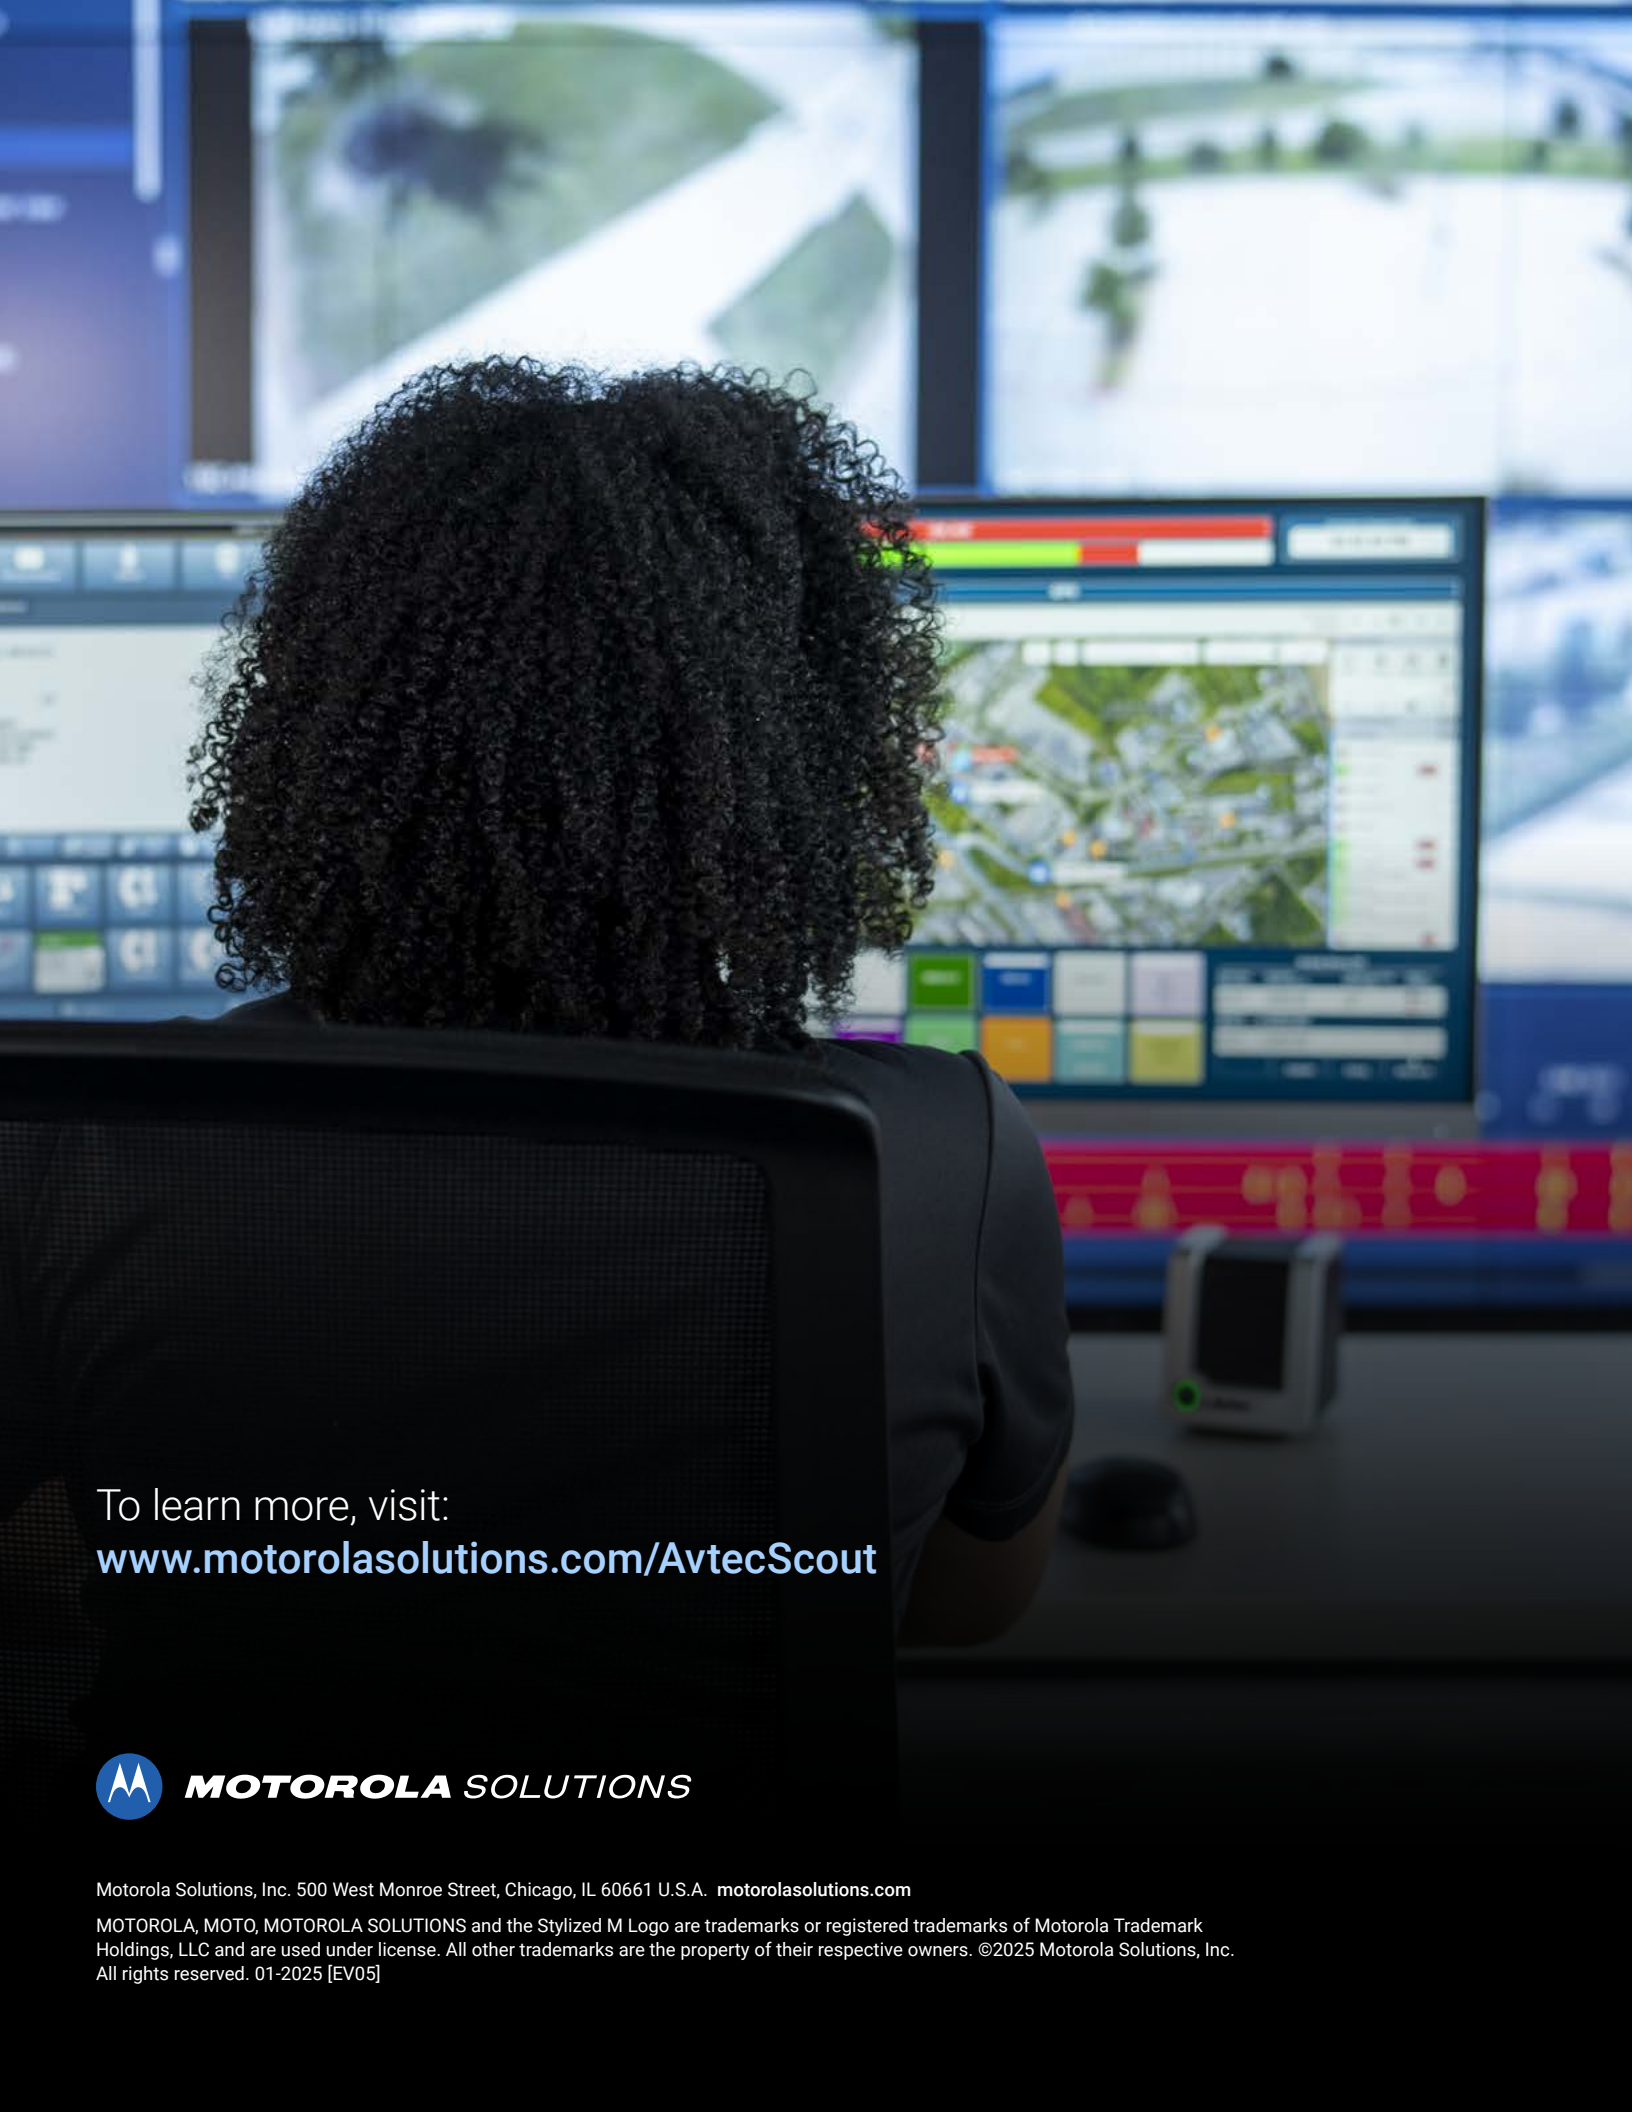

One platform. Unlimited possibilities.

The Avtec Scout radio dispatch console integrates all your communication center needs, whether simple, highly complex or somewhere in between. Discover how our solutions can adapt and scale to any environment. Feel confident in your ability to protect people, assets and livelihoods with the most efficient communications system.
