

Two-Way Radios for Logistics Facilities

MCA IS YOUR TRUSTED ADVISOR FOR A **SAFE, SECURE, AND EFFICIENT** WORKPLACE.

Deploying Radio Solutions Within Logistics Environments

The role of the warehousing environments is evolving. They no longer just serve as a large space to temporarily house inventory, today's distribution facilities are fast-paced and often decentralized. With inventory turning over at breakneck speeds as retailers and manufacturers work to satisfy customer demand in this 'want it now' culture. Operating across multiple channels — retail, catalog and Internet — creates a new set of logistical challenges.

Integrated Communications | [Connecting Any Device, Anywhere, at Anytime](#)

At MCA, we understand and appreciate the challenges of logistics and warehousing workspaces. Successfully operating fast-paced shipping and distribution environments requires durable and reliable technology solutions. In partnership with Motorola Solutions, our team can provide your organization the ability to connect your teams on any device, anywhere, at any time with added intelligence to help them make faster and more informed decisions.

Unified Communications | [Radio Systems in Logistics](#)

Many logistics and warehousing communication solutions allow you to talk, text, share and send information among team members. But what if your teams could seamlessly communicate across devices? Unified Team Communications takes your existing communication investments, ties them together in one integrated platform and adds powerful built-in intelligence.

OUR UNIFIED COMMUNICATIONS PLATFORM... enables your security, engineering, environmental and facility management teams to collaborate and share vital information in critical situations.

OUR PUSH-TO-TALK SOLUTIONS... extends mission-critical communications across any device, anytime, anywhere - including smart devices your teams are already using.

Distribution Centers | [Motorola Solutions in Action](#)

To effectively compete in such a dynamic environment, today's distribution center needs to be both proactive and responsive. No matter the number of distribution centers you manage, regardless of whether the products are located in the warehouse, on the road, or just leaving the manufacturing floor, your organization needs visibility across its' entire supply chain. An in this hyper-competitive market, accuracy is key. Anything with an error rate higher than a fraction of a fraction of a percent can result in a lost customer. To add insult to injury, new track and trace regulations are affecting a wide variety of industries requiring such things as:

- "Farm to fork" traceability in the food and beverage industry
- A complete genealogy in pharmaceuticals to protect against the introduction of counterfeit product that could compromise patient safety
- Constant visibility into the whereabouts of the millions of parts used to build cars, trucks, planes and other vehicles to enable fast location, recall and replacement of defective parts

MCA has the communications devices you need to stay competitive.

Industry Profile

- Warehousing Facilities
- Distribution Centers
- Port Environments
- Loading & Unloading

Featured Solutions

- CP100d Two-Way Radios
- SL300 Two-Way Radios
- XPR 3500e Series Radios
- SLR5000 Radio Repeaters

Motorola CP100d

CP100d Series Portable Two-Way Radios

The CP100D portable two-way radio is a simple, yet effective model for the business or organization that values ease and efficiency. This practical model is an affordable option that can double your talk channels without the cost of a repeater and its associated infrastructure. The CP100D offers both analog and MOTOTRBO digital communications, meaning it can serve your communications needs both today and, in the future, when you're ready to upgrade your system.

- Analog and Digital Voice Communications
- Dual Capacity Direct Mode
- Transmit Interrupt (Decode Only)
- Voice Announcement

Motorola SL300

SL300 Series Portable Two-Way Radios

The SL300 is a powerful two-way radio packaged in a slim, sleek design. This ultraportable radio offers an extended range and a patented antenna, so you can communicate freely with your workers as they move about your facility. The SL300 is simple to use, features a prominent push-to-talk button to support one-hand radio operation, and it's waterproof and dustproof to allow operation in harsh environments. With a range of accessories to support your operations, the SL300 is a great option for an efficient work environment.

- Ultra-Slim with IP54 Rating
- Dual Capacity Direct Mode
- Shatterproof Active View Display (Optional)
- Range Max Receiver
- Analog and Digital Capability
- Transmit Interrupt Capability

Motorola XPR 3500e

XPR 3500e Series Portable Two-Way Radios

The MOTOTRBO XPR 3500e radio delivers next-generation technology that is cost-effective without compromising high-performance capabilities. With integrated Wi-Fi, Bluetooth and enhanced audio capabilities, better battery life, and signal range, the features of this radio enable your organization to operate at its best.

- IP67 Rated w/Available HazLoc Models
- 28 Hour Battery Life
- Up to 8% better Range Channel Lock
- Enhanced Audio w/Bluetooth
- Over-the-Air Software Updates
- Improved Expandability

Motorola SLR5000

SLR5000 Series Radio Repeater

The SLR5000 series repeater delivers high-performance, highly-reliable two-way radio connectivity with all the features you need to connect your workplace from the field to the warehouse floor. With its sleek form factor and low power consumption, the MOTOTRBO SLR 5000 Series is engineered for low cost of ownership. Whether you need the simplicity of a single-site conventional system or powerful trunking capabilities, the SLR 5000 Series delivers the power of digital two-way radio to your workforce.

Compared to first-generation repeaters, it has 10x more processing power, 15x more memory and 125x more data storage, and round-the-clock reliable operation, even at its continuous full transmit power of 50W.

About MCA | Over 30 Years of Experience

More than 65,000 customers trust MCA to provide wireless communication solutions for a safe, secure and more efficient workplace. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better.

MCA offers a carefully curated portfolio of world-class voice, data and video products and solutions. With more than twenty product lines and hundreds of solutions, our team of certified professionals across the United States deliver a full suite of reliable technologies with a service first approach.

The MCA advantage is our extensive service portfolio to support the solution life-cycle from start to finish.
