

Empowering Government Connectivity with In-Building Wireless Solutions

As populations grow and the demands of municipalities and government agencies increase, so do their needs for robust communications infrastructure. This is where MCA's dedicated In-Building Wireless Solutions (IWS) team shines as a beacon of unparalleled expertise and reliability.

At a time when connectivity is synonymous with progress, our IWS professionals are committed to ensuring that governments are connected today and future-ready. By staying abreast of the latest technological advancements and integrating scalable solutions, MCA future-proofs government communication infrastructure, guaranteeing that it evolves in harmony with the ever-changing demands of the digital age.

With an extensive history of successful collaborations, MCA has emerged as the preferred partner for local, state, and federal governments, addressing their extensive in-building wireless communication requirements. Whether city planning teams are meticulously coordinating intricate infrastructure expansions, military bases are in need of highly secure and dependable connectivity to safeguard our nation, or government entities are searching for flawless communication solutions, our IWS team is unwaveringly committed to meeting the most stringent and unique requirements.

Tailored Solutions for Every Stage

MCA distinguishes itself through its flexibility and unwavering dedication to supporting clients throughout every project phase. Whether governments require comprehensive system designs, seamless end-to-end implementation, or ongoing maintenance, our IWS professionals seamlessly integrate into your projects, effectively becoming an extension of your team. We adeptly navigate challenges, overcome obstacles, and guarantee project success. Our expertise encompasses planning and design and beyond, ensuring that government entities' in-building wireless communication requirements are fulfilled and surpassed.

Navigating Regulatory Complexities

Government projects often involve intricate webs of regulatory demands, and specialized contract frameworks often emerge. MCA excels at adeptly navigating these complexities, guaranteeing a streamlined process for our clients and partners.

Whether it's requirement such as a contract with the GSA (*General Services Administration*) for federal projects or state-based agreements like the NCSC (*North Carolina State Contract*), MCA employs its own contracts directly or collaborates via our extended family of companies (including USAT, Infinity, and more) to harness their credentials.

This strategic approach surmounts bureaucratic challenges, positioning us as the government's preferred and trusted partner. Additionally, as a trusted and platinum channel partner of Motorola Solutions, the MCA team is often brought onto large-scale State, Local, and Education (SLED) projects where the municipality or group has contacted Motorola Solutions directly.

Collaborative Partnerships

Our work with local, state, and federal entities extends beyond a traditional client-contractor relationship. By actively engaging with your city planners, military installations, and government agencies, our IWS team understands these entities' unique challenges and is able to forge enduring partnerships. This deep understanding allows us to craft solutions that align perfectly with governmental goals and objectives, ensuring a seamless blend of practical implementation and cutting-edge technology.

Building Tomorrow's Connectivity Today

Our IWS team doesn't merely construct wireless communication systems — we craft pathways to flawless connectivity, enabling advancements that safeguard secure government communications. Through partnerships with government agencies, regardless of project scope or scale, we ensure the groundwork for tomorrow's digital infrastructure is being meticulously laid today. Rooted in a legacy of excellence and propelled by a forward-looking vision, we emerge as a steadfast government ally, guiding them along their journey toward unparalleled connectivity and communication efficiency.

About MCA

MCA is one of the largest and most trusted DAS integrators in the United States, offering world-class voice, data, and security solutions that enhance the quality, safety, and productivity of customers, operations, and lives. More than 65,000 customers trust MCA to provide carefully curated solutions for a **more safe, secure, and efficient workplace**. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better. Our team of certified professionals across the United States delivers a full suite of reliable technologies with a service-first approach. The MCA advantage is our extensive service portfolio to support the solution life-cycle from start to finish.
