

Security Solutions | Physical Security Screening

Evolv Express® Enables Safe and Healthy Screening Processes

Ensure that everyone who enters your facility is safe and protected with AI-powered weapons detection that is 10 times faster than metal detectors — screening 3,600 people an hour. Screening for possible weapons threats at every entryway ensures your staff feel safer, maintains a sense of dignity and welcome for all visitors and patients, and helps to prevent those intending to do harm.

Safety Without Compromise — Introducing Evolv Express

Evolv Express is the world's only AI-based touch-less security screening solution that improves the visitor experience without sacrificing security. With Evolv Express, your guests can pass through screening without divesting or breaking stride.

Create a Safe Haven for Patients, Staff, and Visitors

Hospitals and other healthcare facilities cannot bear the undue burden of threats from workplace violence and other forms of interpersonal attacks that can put their staff, visitors, and patients at risk. Your security and operations teams are tasked with protecting everyone in their care, but traditional metal detectors can result in unsafe lines at entryways and create soft target scenarios in and of itself and significantly increasing the anxiety of your patients, visitors, and medical personnel.

Intelligent Security Screening

Evolv Express combines advanced sensors, cameras, and artificial intelligence to identify threats while ignoring harmless personal items. When a potential threat is detected, real-time image-aided alerts show guards the precise location of the potential threat on a person or in a bag. Unlike invasive bag checks, pat downs, wand waves, and long lines related to metal detectors, Evolv Express keeps high-volume entrances flowing by reliably detecting weapons while visitors walk through at a natural pace, carrying their phones, bags and other items.

Why MCA?

Enterprise leaders faced with problems from communication gaps, security challenges, and data threats choose MCA's certified teams to design, implement, and maximize solutions, from the most trusted and reliable US-based manufacturers. These leaders love the assurance of MCA's local sales and service teams, being there in the moments that matter throughout the life of the solution. **We are the trusted advisor for a safe, secure, and efficient workplace.** MCA offers a carefully researched portfolio of voice, data, and security solutions. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better.

Fast, Efficient Threat Screening

Screens 3,600 ppl/hr — 10X faster than traditional metal detectors — for a line-free experience. No stopping, emptying pockets, or removing bags.

Flexible Deployment Options

Deploy for indoor or outdoor screening. Easy to set up and move. Multiple deployment options including single- or duallane configurations.

Simple Operation - Faster Resolution

Real-time view of the exact location of potential threats on a person or their bag. Enables faster resolution and reduces physical contact.

Integration & Performance Analytics

Integrate with your broader security infrastructure and utilize the analytics dashboard to improve staffing, training, and traffic flow at every entrance, at various times and during the peaks and valleys of the daily cycle.
