Security Solutions | Video Surveillance

Comprehensive Enterprise-Grade Surveillance Solutions from MCA

Cameras

IP cameras from MCA can do more than protect your company's assets. With enhanced picture quality and clarity, our cameras can provide surveillance designed to maintain the safety of your company's employees and customers. All of our cameras, from fisheye to pan-tilt-zoom, are built to work in the tightest corridors and high-security areas. We can work with you to provide 24/7 live video surveillance to meet your needs.

Software and Video Analytics

If you're looking for smarter video surveillance, MCA's software and video analytics can help you zero in on particular video footage. With our facial recognition software powered by a state-of-the-art AI hardware appliance you can locate persons of interest in your facilities more accurately and efficiently. Additional features allow your security teams to focus in on suspicious objects and vehicles.

Command Centers

MCA can provide you with a custom command center design to give your security personnel a functional space to monitor your buildings and property. Whether you need a complex command center console for a single security professional or a command center for mission critical surveillance, we can work with your budget to meet your needs.

Storage

MCA offers the latest in cloud storage to address your video storage needs. Our video surveillance solutions include giving you the ability to play back and review video footage. Using MCA's storage technology, you can remotely upload and store all of your video surveillance footage on a secure web portal.

VSasS (Video Surveillance as a Service)

Storing surveillance footage onsite can take up a lot of hard drive space that can be put to better use. VSaaS from MCA helps solve this problem. Instead of storing surveillance footage on-site, let us empower you to remotely store, manage, record, play, and monitor surveillance footage securely and effectively from the cloud.

Why MCA? | Device Selection, Network Design, System Implementation, and Managed Services

We are the trusted advisor for a safe, secure, and efficient workplace. MCA offers a carefully researched portfolio of voice, data, and security solutions. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better. When you choose MCA, you're also connecting to our Service-First DNA. With our Managed Technology-as-a-Service (MTaaS) offering, you'll never be surprised by hidden costs or fees. We offer a flat, budget-friendly recurring cost without additional finance charges. Our team of experts will manage your solution from start to finish, giving you the best return on your investment.

When combined with our SecurePlan™ suite of tools and services, we proactively support our customers by ensuring SLA terms compliance — remotely troubleshooting and capturing information, monitoring for predictive signals such as drive failure alerts, thermal conditions, and network loads — to address them prior to failure, maximizing the uptime of your critical security systems. Avoid training employees on how to use our solutions: when you partner with MCA, we shoulder the burden of managing technology upgrades and creating road maps for technology upgrades while maintaining and supporting your solution throughout its life-cycle.
