

Managed Technology-as-a-Service | Benefits Overview

MCA helps you focus on what matters most by taking the complexities of communications technology management off your plate. Utilizing our Managed Technology-as-a-Service (MTaaS) program, provides organizations with a dedicated team of trusted service professionals that ensure your communications systems remain seamless, reliable, and expertly managed—so you can keep your attention on mission-critical priorities.

MCA's MTaaS Program Benefits

- **Fully Managed Solution:** MCA owns, operates, and supports the custom-built solution from end to end—removing the hassle of purchasing, deploying, and managing complex technology.
- **Predictable Costs:** Gain the assurance of a known Total Cost of Ownership (TCO) with a budget-friendly, recurring cost structure that covers all support and maintenance.
- **Simplified Acquisition:** Secure the best solution without tying up capital, securing additional financing, or managing asset depreciation over time.
- **Adaptable Contracts:** Our flexible contract terms allow you to leverage current assets and scale the system as your needs evolve.
- **Operational Focus:** MCA's expert team manages the technology, allowing you to concentrate on core business priorities without needing specialized skills, tools, or training.
- **Reduced Risk:** MCA handles upgrades, compliance, security, obsolescence management, and issue resolution, minimizing the risks and challenges associated with managing complex technologies independently.
