

Security Solutions | Access Control Systems

Complete Indoor and Outdoor Access Control Solutions from MCA

Electronic Locking Hardware

Mechanical locks fail to provide the same level of security and are more difficult to manage than electronic locking hardware. With MCA, you can use electronic locking hardware to make all of your locked doors access-controlled doors. You'll have more control and will benefit from real-time monitoring, making your property safer.

Visitor Management

Our visitor management solution provides a more modern and efficient access control than paper logs ever could, cutting down the amount of time it takes to register new and returning visitors. Protect your employees and facilities by using a web application to enroll visitors before they arrive. Assign access rights to each visitor and track their movements while they're on your property.

Credential Management

The pandemic magnified the need for touch-free options. But even before the pandemic, most people would likely prefer their smartphones if they could. Gaining access to parts of a facility is an example. Plus, it's easier for your employees and visitors to remember their phones instead of key cards. With MCA's credential management solution, you can incorporate fingerprint and facial recognition for even greater security. Plus, administrators won't need to store, issue, or revoke key cards.

Biometrics Based Access

Using MCA's biometric technology, you can provide easy access and enhanced security in your building. Device biometrics like fingerprint and facial recognition make it easier to enroll and verify a visitor on your property. And, since biometric data is the most accurate and reliable data, you can be sure you know who is in your building and what they're doing.

Entrance Control and Bollards

MCA's cloud-based entrance-control solution enhances your security to protect your employees and visitors, your property, and your data. Video allows you to make more informed decisions. We will work to help you collect more useful data by connecting physical access controls with identity and access management.

Cloud-Based Software

Cloud technology offers advantages that dated access control systems simply can't offer. MCA's cloud-based platform combines a video management system, intrusion alarms, and more so that you can have all the data you need in one place. Not only does this improve your level of security, it improves your operational efficiency as well. Automated software updates save you money by reducing costs and minimizing downtime. We can work with you to meet your needs.

Why MCA? | Device Selection, Network Design, System Implementation, and Managed Services

We are the trusted advisor for a safe, secure, and efficient workplace. MCA offers a carefully researched portfolio of voice, data, and security solutions. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better. When you choose MCA, you're also connecting to our Service-First DNA. With our Managed Technology-as-a-Service (MTaaS) offering, you'll never be surprised by hidden costs or fees. We offer a flat, budget-friendly recurring cost without additional finance charges. Our team of experts will manage your solution from start to finish, giving you the best return on your investment.

When combined with our SecurePlan™ suite of tools and services, we proactively support our customers by ensuring SLA terms compliance — remotely troubleshooting and capturing information, monitoring for predictive signals such as drive failure alerts, thermal conditions, and network loads — to address them prior to failure, maximizing the uptime of your critical security systems. Avoid training employees on how to use our solutions: when you partner with MCA, we shoulder the burden of managing technology upgrades and creating road maps for technology upgrades while maintaining and supporting your solution throughout its life-cycle.
