

# Full Spectrum Public Safety Communications for Emergency Rooms

## The APX Consolelette | Ensuring Complete RF Coverage for Major Medical Facilities

### Comprehensive Interoperability for Urban Hospitals and Trauma Centers

For major medical centers in metropolitan areas and critical trauma centers serving multiple jurisdictions, seamless communication is not optional—it is essential. As first responders and agencies across your region utilize every public safety band, from VHF and UHF through UHF2 (T-Band) and into 700/800 MHz P25 digital systems, your Emergency Room must be able to communicate across them all. The ability to receive and transmit on every band ensures your team can coordinate instantly, respond decisively, and deliver life-saving care without barriers or delays.

Engineered to be the heartbeat of critical communications, the APX Consolelette empowers your team to coordinate with any agency, on any band, in both analog and P25 digital systems—all from a single device. This means whether you're supporting daily operations or navigating citywide emergencies, your facility is equipped to connect, communicate, and collaborate without barriers.

### Why Choose the APX Consolelette?

- **Unrivaled Multi-Band Coverage:** Seamlessly communicate across VHF (HEAR), UHF (including T-Band Medical Channels), and 700/800 MHz (P25) frequencies—eliminating the complexity of managing multiple radio systems.
- **Analog and P25 Digital Ready:** Bridge new and legacy communication networks, ensuring all partner agencies are heard, regardless of technology.
- **Premier Dispatch Performance:** Intuitive controls, robust security, and reliable operations—trusted by leading urban hospitals and trauma centers to deliver when it matters most.
- **Purpose-Built for Compliance:** Support evolving requirements for multi-agency, multi-band operability, keeping your facility ready for the most stringent mandates.

### Integration That Expands Your Reach

The APX Consolelette is designed to work alongside advanced systems like the SLR 8000 base unit and the MCD 5000 Deskset for facilities seeking centralized control and a truly unified communications platform.

- **IP Network Integration:** Ensures fast, secure connections between the APX Consolelette, SLR 8000, and MCD 5000 through a central Radio Gateway Unit (RGU).
- **Wireline Card Compatibility:** Enables expanded external interface options for sophisticated deployments.
- **Custom Configuration Support:** MCA's certified team members handle all specialized setup, from IP programming to ensuring smooth interaction between all system components.

While these integrations build on your communications backbone, the APX Consolelette remains the cornerstone—delivering comprehensive control and future-ready peace of mind.

## For Hospitals Where Every Connection Counts

Choose the APX Consolette for facilities where multi-agency coordination isn't just a goal—it's a necessity. Ideal for major urban hospitals, trauma centers, and any environment requiring rapid, clear, and reliable interoperability across every radio band.

**Ready to Advance?** Strengthen your ER's communication with the industry's premier interoperable solution. Connect with an MCA expert to discover how the APX Consolette—*supported by seamless integration with the SLR 8000 and MCD 5000*—can bring uncompromised connectivity and consistent excellence to your mission.

## About MCA

**We believe every workplace should be safe, secure, and efficient.** As trusted advisors, we deliver integrated communication, connectivity, and security solutions with a **Service First mindset** – *driven by a team that cares deeply about our customers and each other.*

**Why MCA?** At MCA, we help solve critical communication, connectivity, and security challenges with turnkey, integrated system solutions—*from two-way radios and in-building wireless to video surveillance, access control, and more.* MCA is built from **over 50 companies** with deep technical expertise and strong local roots. **And we're still growing—expanding our capabilities, our reach, and our team.**

Our **100+ Solution Centers** bring together sales, installation, service, and customer operations teams to deliver seamless, nationwide support. **Guided by our Service First value,** we don't just connect the wires and walk away—we *provide customized solutions backed by deep expertise and lifecycle support.*
