

Private Security Firms

MCA Communications and Surveillance Offerings Allow Private Security Firms To More Effectively Protect Their Personnel and Clientele

Improving Private Security Operations with MCA

Private security firms in the United States employ nearly 1 million security guards - not to mention other administrative staff - and generate over \$42 billion in annual revenue. While there was a slight dip in private security service expenditures during the coronavirus pandemic (*due to building closures and limited travel*), the industry has roared back to life and continued its robust growth and expansion.

MCA possesses an extensive portfolio of communication and security products and services, from video surveillance systems to cellular networking solutions, to help ensure the safety, security, and connectivity of your clients and staff.

Protecting Your Team And Clients With Best-In-Class Technology

MCA solutions for security firms are designed to withstand fast-paced and ever-changing environments. Our mission-critical two-way radios, best-in-class vehicle routers, private wireless networks, and more provide your agency with what it needs to successfully improve coordination efforts, reduce response times, and protect your clients.

MCA's two-way radios provides your security guards, drivers, and dispatch teams the best in mission-critical voice communication.

State-of-the-art access control systems with card readers, RFID scanners, and biometric capabilities to keep your client's homes and offices safe.

Private LTE systems create a secure network for surveillance systems and security devices to operate independently of public networks.

Protect people and facilities with industry-leading intelligent video cameras with integrated AI search capabilities and enhanced detection systems.

Professional Services

We offer engineering services, project managers, system managers, and FCC Licensing to provide you with a full service team for the successful design, deployment and life-cycle support of your project.

Installation Services

From radio site development, staging and testing, and system development to installing aftermarket and OEM equipment to fleet vehicles, MCA has a devoted certified technical staff to meet your needs.

Solution Support

Our team provides full-service maintenance, repair and managed solutions services. Our dedicated support staff can manage your customized solutions — allowing you more time to focus on your business.

Rental Services

Many of our products are available via customer-friendly short and long-term rental programs. Our easy-to-use and personalized rental service helps meet your evolving communications and technology requirements.

Radio Solutions

MotoTRBO Radios and Rentals

Connect instantly from dispatch to transit vehicles with radios ranging from entry-tier solutions for simple communications to customizable systems designed to meet your specific needs and coverage area.

MotoTRBO Radio Accessories

Ensure clear communication with the right accessories, including remote speaker microphones, earpieces, and headsets featuring noise cancellation and improved audio and reception.

Wave PTX OnCloud and PTX Dispatch

Connect teams at the push of a button across different networks and devices, while eliminating the needless headaches and hassle of routing and rerouting security teams and vehicles with CAD integrated with GIS and AVL.

Security Solutions

Video Surveillance

MCA delivers IP-based tamper-resistant video surveillance systems with the latest in self-learning and intelligence software like automatic facial and license plate recognition for optimal security.

Detection Systems

Our detection systems monitor physical facilities for break-ins, trespassers, access to restricted areas, concealed weapons, and more while our digital detection systems monitor for cyberattacks and malware.

Access Control Systems

We install state-of-the-art access control systems wherever they're needed, whether in your facilities, or your clients, complete with card readers, RFID badges, and biometric scanning capabilities.

Data Solutions

Wireless Backhaul

MCA can provide security companies with cellular wireless backhaul solutions to provide the primary and backup connectivity their facilities, and client's facilities need to ensure security systems never go down.

Private LTE with Nitro™

We'll help you build the infrastructure your clients' need to transmit and receive private and secure voice, data, and video communications throughout their key facilities with Motorola Nitro™.

Mass Notification Systems

In the event of an emergency situation, our mass notification and alerting solutions help your personnel ensure people throughout your clients' facilities are informed, alerted, and directed to safety.

Fleet + Personnel Solutions

Mobile Video Systems

Vehicle and body-worn video camera systems allow for live POV streaming of emergency events and security breaches while providing historical footage for evidence collection and personnel training.

Incident Management

With Ally software available from MCA, your agency can streamline and manage real-time end-to-end incident reporting and record keeping from any web-enabled device for increased operational transparency.

Vehicle Area Networks

Our purpose-built single and dual radio 5G cellular routers enable real-time data communications between security vehicles and central command with Wi-Fi for connected smart devices and vehicle sensors.
