Empowering America's Private Security Teams and Thriving Enterprises with Cutting-Edge Communication and Security Solutions

Private security is a cornerstone of modern safety and operational integrity, protecting people, places, and properties across diverse environments. From commercial facilities and industrial sites to government operations, executive protection, and large-scale events, private security teams and businesses play a critical role in safeguarding assets and maintaining order.

With an estimated market size of \$48 billion and over 1.2 million security personnel employed in the United States alone, the private security sector is experiencing steady growth. This expansive industry, spanning guarding services, cash transit, investigations, and more, requires advanced tools to address evolving challenges, including rising global threats, technological complexities, and increasing client expectations.

At MCA, we recognize the vital role private security teams play in today's world and are committed to providing them with the technology and support needed to succeed. Our comprehensive suite of voice, data, and security solutions is tailored to meet the unique demands of

security personnel and businesses, empowering them to operate more efficiently and effectively.

Our voice solutions enable seamless communication, ensuring that security teams remain connected and coordinated in real-time, whether managing a high-profile event or monitoring critical infrastructure. Our data solutions enhance situational awareness through fleet tracking, centralized monitoring, and real-time data sharing, streamlining operations and improving response times. Meanwhile, our security solutions provide advanced tools such as intelligent video surveillance, access control systems, and intrusion detection technologies to proactively mitigate risks and protect high-value assets.

By integrating these solutions, MCA supports private security organizations in addressing their most pressing challenges. We empower security professionals with the tools and technologies they need to deliver exceptional service, adapt to evolving threats, and maintain the highest levels of safety and operational excellence.

Integrated Technology Ecosystems for Private Security Teams and Enterprises

Two-Way Radios and Radio Coverage Systems

Mobile Vehicle and Body Worn Cameras

Vehicle and Fleet Upfitting Services

Intelligent Video Surveillance and Analytics

High Security Access Control Systems

Perimeter and Intrusion Detection Systems

Fixed and Mobile Cellular Networking

Private Wireless Network Communications

Mass Notification and Alerting Systems

MCA empowers private security organizations with advanced solutions that enhance communication, coordination, and operational efficiency. Our technologies facilitate robust communication networks for rapid emergency response, seamless operational management, and effective critical announcements. Whether you're leading a security team within an enterprise or managing an entire private security business, MCA is your trusted partner in creating a safer, more secure world.

Voice Solutions

Our voice team empowers seamless connectivity, coordination, and operational efficiency across private security operations. Designed for high-pressure environments, these solutions ensure safety, reliability, and the real-time communication required to protect people, property, and critical assets effectively.

Two-Way Radios and Radio Systems

MCA provides MOTOTRBO radios, radio accessories, and fixed and mobile repeater systems tailored to the needs of private security teams. These solutions deliver secure, reliable communication for patrol officers, security guards, and mobile units. Integrated with WAVE PTX Dispatch and the ALLY Incident Management Platform, our systems enable real-time coordination, efficient resource management, and seamless communication, ensuring quick and effective responses to incidents.

Mobile Video Systems

We provide Motorola VB400 and Axis W110 body cameras offering real-time streaming and evidence-grade recording for security personnel, armored teams, and repossession agents. Combined with our video and evidence management platforms, these solutions enhance situational awareness and accountability, ensuring effective incident management and protection for clients, personnel, and assets.

Vehicle Up-Fitting

MCA ensures security fleets are equipped for peak performance in the field. We specialize in upfitting patrol vehicles, armored cash transport vehicles, and tow trucks with essential technologies such as mobile radios, rugged laptops, secure device mounts, vehicle routers, and advanced antenna systems. These upgrades, including emergency lighting systems for enhanced visibility, ensure constant communication, real-time data access, and operational efficiency, supporting private security personnel in delivering reliable and effective service.

Security Solutions

As the threat landscape evolves, MCA provides comprehensive security solutions to safeguard facilities managed by private security firms as well as client-owned systems. Our surveillance, access control, and detection systems seamlessly integrate to enhance safety and secure multi-purpose environments.

Intelligent Video Surveillance and Analytics

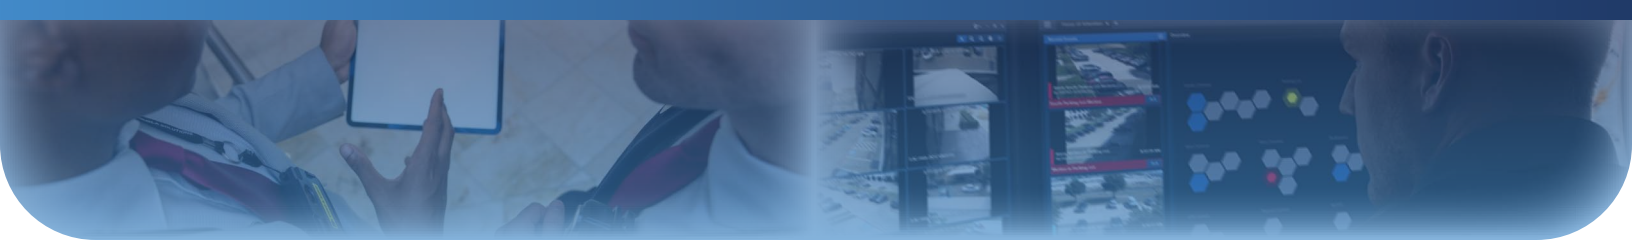

Our video surveillance systems, equipped with intelligent analytics, enhance security and situational awareness for facilities managed by third-party security personnel or in-house teams. Offering real-time monitoring, object detection, and behavior analysis, these solutions enable proactive threat identification and swift responses. High-resolution footage and actionable insights improve security and operational efficiency across offices, car parks, secure storage areas, and client sites.

Multi-Factor Access Control Systems

Our multi-factor access control systems ensure that only authorized personnel access sensitive areas. Utilizing advanced technologies such as biometric scanners, RFID readers, and smart card access, these systems provide layered security. When integrated with video surveillance and alarm systems, they create a comprehensive security network to protect critical assets and facilities managed by private security teams.

Perimeter and Intrusion Detection Systems

To safeguard offices, storage facilities, and client properties, our team offers state-of-the-art perimeter and intrusion detection systems. These include motion sensors, infrared barriers, seismic detectors, and counter UAV platforms to monitor and secure perimeters. Integrated with, and sometimes a feature of, our video surveillance and access control systems, our detection solutions provide real-time alerts, enabling rapid identification and response to unauthorized access, ensuring the security of both personnel and assets.

Data Solutions

Our data solutions cater specifically to the needs of private security operations, providing robust connectivity and enhanced communication capabilities to support safety, operational efficiency, and rapid response in fixed, mobile, and temporary applications. Combined, these solutions form a comprehensive framework that empowers private security teams to safeguard people, assets, and facilities effectively.

Cellular Networking (CNS)

Our CNS team ensures reliable connectivity for fixed and mobile security operations. From cellular failover systems that maintain business continuity during outages to mobile routers that enable vehicle-based communication, these solutions keep security personnel connected and operational. Whether supporting surveillance networks at large facilities or ensuring patrol vehicles remain in constant contact, our cellular solutions enhance coordination and efficiency in any environment.

Private Wireless Networks

For large client-owned buildings and grounds, MCA deploys private wireless networks to support connectivity for security solutions. These networks provide reliable communication for surveillance systems, access control, perimeter security, vehicles within the grounds, and handheld radios. Additionally, they enhance cybersecurity, ensuring greater protection and seamless integration across voice and security solutions for comprehensive coverage of expansive properties.

Mass Notification Systems

Our mass notification solutions enable swift dissemination of critical information during emergencies. Fixed systems are ideal for large client-owned facilities, delivering alerts to staff and visitors via audio, visual, and digital platforms. Wireless systems, such as Rave Alert, include panic buttons and direct communication with local public safety officials, ensuring rapid responses and enhanced safety in dynamic security environments.

Our Services

MCA is dedicated to empowering private security organizations with reliable, secure, and cutting-edge technology solutions. As a trusted partner, we provide the expertise, support, and integration capabilities necessary to address the complex operational and security challenges you face. Our solutions ensure seamless coordination, enhanced safety, and robust operational efficiency tailored to your unique needs.

Professional Services

Our professional services offer unparalleled expertise in system design, installation, and implementation. With over 90 locations across more than 15 states, MCA's specialized field engineering teams deliver precise on-site deployments and seamless integration with existing infrastructure. We provide tailored voice, data, and security solutions to private security firms and in-house security teams, ensuring reliable operations across diverse environments.

Managed Services

MCA's managed services deliver peace of mind through proactive system management and support. With Service Level Agreements (SLAs) and Managed Technology-as-a-Service (MTaaS) programs, we ensure high performance and reliability. SecurePlan provides continuous monitoring and swift issue resolution, enabling private security organizations to focus on protecting clients, personnel, and assets without interruptions caused by technological challenges.

Integration Services

Our integration services streamline and unify security operations. MCA's command center solutions, custom APIs, and application development create seamless interoperability across disparate systems, enhancing situational awareness and operational efficiency for both small and large scale Security Operations Centers (SOC). With advanced audio-visual solutions, security teams can centralize monitoring and control, enabling effective management of complex scenarios with precision and clarity.

Partner With MCA as Your Trusted Advisor

MCA partners with private security companies and teams across diverse industries, including commercial, industrial, government, and event security, as well as cash transit and executive protection services. Our voice, data, and security solutions, combined with extensive service offerings, deliver top-tier connectivity, operational efficiency, and safety. MCA's expertise ensures the seamless implementation of advanced technologies, empowering security organizations to meet the highest standards of protection and reliability.

About MCA

MCA is one of the largest and most trusted technology integrators in the United States, offering world-class voice, data, and security solutions that enhance the quality, safety, and productivity of customers, operations, and lives.

More than 65,000 customers trust MCA to provide carefully researched solutions for a safe, secure, and more efficient workplace. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better.

Our team of certified professionals across the United States delivers a full suite of reliable technologies with a service-first approach. The MCA advantage is our extensive service portfolio to support the solution life-cycle from start to finish.
