

## Evolv Express® | Touchless Security Screening

### The days of invasive weapons screening are over.

Screening procedures relying upon metal detectors, hand wands, and invasive bag checks are slow and manual, resulting in uncomfortable, and unsafe, crowding.

### Introducing the Evolv Express®

Evolv Express is the world's first and only touch-less security screening solution that meets all of the post-pandemic security screening requirements. Express is proven to operate up to ten times faster than traditional metal detectors with its dual-lane, free-flow entrances and fusion of new sensor technology and artificial intelligence. The system is able to spot weapons while ignoring harmless personal items all while visitors simply walk through at a natural pace. Families and groups of people can now walk in together without long lines. It's a welcoming experience and allows them to make their way to the concessions or seats quicker.

**AI differentiates personal items from threats.** Unlike traditional metal detectors, Evolv Express uses advanced sensor technology and artificial intelligence to screen guests while they walk through at a natural pace—without stopping and without handing over their belongings. Express offers a dual lane, free-flow system proven to operate up to ten times faster than traditional metal detectors, alerting operators to the presence of weapons while ignoring harmless personal items like cell phones, keys, and coins.

**See potential threats for faster issue resolution.** When a potential threat is detected by the system, real-time image aided alarms show guards where the potential threat is located on a person or within their bags — greatly reducing the amount of physical contact required and allows guards to act quickly and efficiently.

**Prioritize the guest experience.** Families and groups can enter your venue together without long lines and without invasive checks. It's a welcoming experience that maintains dignity and accelerates entry for your guests and employees while keeping venues and facilities safe from threats. Advance a proactive security posture. With Evolv Insights, the accompanying web-based and mobile-enabled analytics application, Evolv Express can account for its own performance, supporting post-event analysis and future operational planning. View visitor arrival curves and alarm rates by entrance, time, and date to understand where and when the flow of people—and threat objects—peak. Staff entrances accordingly for a proactive approach to security and operations.

### Only Evolv Express®

**Fast and Efficient:** Screen 3,600 people per hour, 10X faster than metal detectors.

**Easy to Operate:** See where the threat is located, reducing search time and fatigue.

**Flexible and Portable:** Ideal for indoor and outdoor use, easy to set up and move.

**Integration:** Communicate alerts to other security technologies across a venue.

**Analytics:** Support post-event analysis and a proactive security posture with the Web-based and Mobile-enabled app

**Integrate with security technologies across your venue.** Easy-to-configure integrations with security technologies like VMS (video management systems) and MNS (Mass Notification Systems) are built into Evolv Express, allowing critical notifications and alert images to be communicated throughout your venues complete extended security ecosystem. Teams within your SOC (Security Operations Center) can instantly receive verified threats, requests for assistance, and location information from Evolv Express, initiating security protocols and procedures when a weapon is identified at the system to better protect your guests and employees.

“We knew our former security screening process would provide challenges in the pandemic environment,” said Jason White, managing director of corporate safety and security at Hershey Entertainment and Resorts. “We’d already been evaluating how we could improve on our guest screening process and had piloted Evolv Express last fall because the system could accommodate thousands of people an hour in a frictionless, nostop flow. As we began formulating the security screening aspect of our pandemic reopening strategy, it was clear that Evolv Express was the best solution that could meet our requirements. Our guests and security staff have been pleasantly surprised at the speed of the touchless screening experience that largely eliminates manual bag checks. The responsive customer support and working relationship we have with the Evolv team is just as phenomenal as their product.”

## About Evolv Technology

Founded in 2013, Evolv Technology is the leader in human security solving the security screening problems of today with the most innovative technology and thinking. Evolv makes it possible for venues of all kinds to keep visitors and employees safe from concealed weapons, pandemic health threats and intruders. The company's Evolv Express has earned several industry accolades that include the 2021 Artificial Intelligence Product Excellence Award, 2020 Edison Awards™, 2020 Campus Safety BEST Award, and two different 2020 Secure Campus Awards.

## About MCA

**We are the trusted advisor for a safe, secure, and efficient workplace.** MCA offers a carefully researched portfolio of voice, data, and security solutions. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better. When you choose MCA, you're also connecting to our Service-First DNA. With our Managed Technology-as-a-Service, you'll never be surprised by hidden costs or fees. We offer a flat, budget-friendly recurring cost without additional finance charges. Our team of experts will manage your solution from start to finish, giving you the best return on your investment.

**When combined with our SecurePlan™ suite of tools and services,** we proactively support our customers by ensuring SLA terms compliance — remotely troubleshooting and capturing information, monitoring for predictive signals such as drive failure alerts, thermal conditions, and network loads — to address them prior to failure, maximizing the uptime of your critical security systems. Avoid training employees on how to use our solutions — when you partner with MCA, we shoulder the burden of managing technology upgrades and creating road maps for future technology utilization, while maintaining and supporting your solution throughout its' complete life-cycle.
