

The Future of Fire Station Automation and Alerting is Here: *And It's Firefighter Focused*

Next-Generation Firefighter Alerting™: A Partnership for Innovation & Safety

MCA, in partnership with Prism-IPX Systems and EaseAlert, is proud to introduce a state-of-the-art, integrated solution for Fire Station Alerting (FSA) and Firefighter Alerting™ Systems (FFAS). This collaboration addresses a critical gap in the market, providing an affordable, scalable, and future-proof system designed for the 80% of fire stations that cannot justify the high cost of traditional enterprise-level alerting systems.

Modernize Your Station, Protect Your Personnel

Historically, advanced fire station alerting was prohibitively expensive, leaving many departments with outdated, unreliable solutions. This integrated FSA and FFAS platform combines Prism-IPX's P25-native radio interface with EaseAlert's wireless, individual alerting technology to deliver a superior, cost-effective alternative.

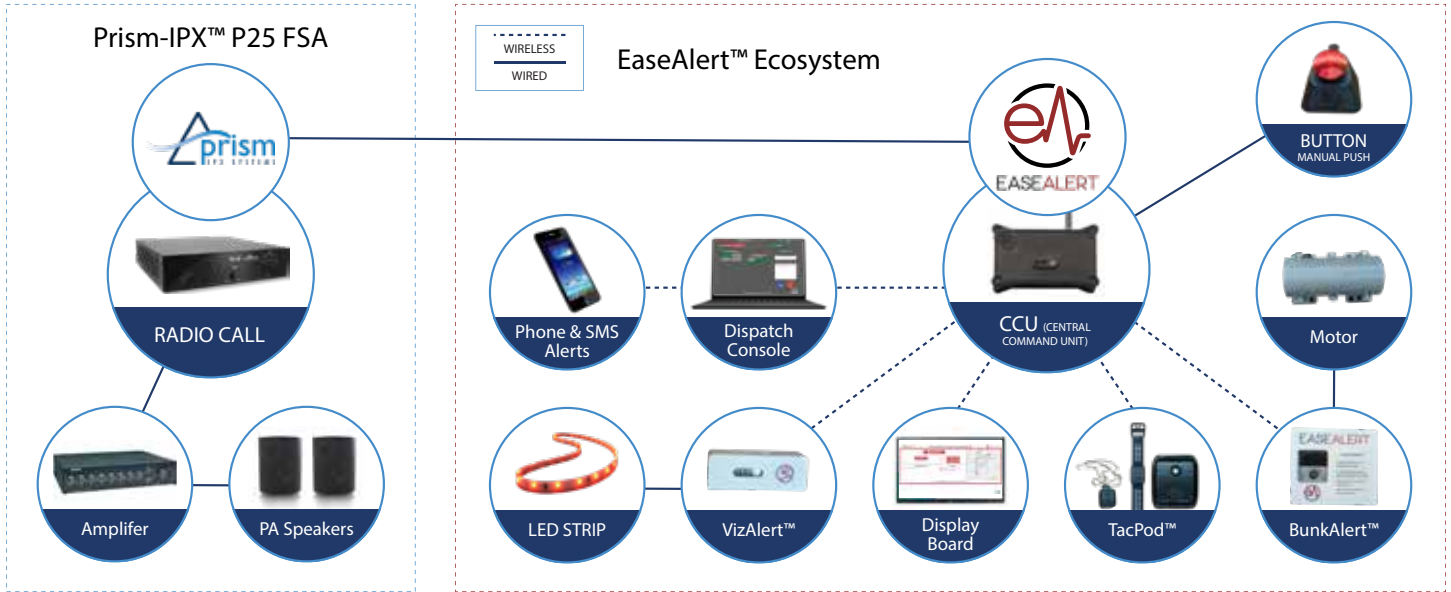

The Prism-IPX™ P25 FSA device receives the dispatch call and seamlessly triggers the EaseAlert® system, activating a secure, encrypted wireless mesh network within the station for targeted, reliable alerts.

Key Solution Highlights:

- **Affordable & Scalable:** A modular, plug-and-play design allows for phased implementation that aligns with annual budgets. Start with a base package and expand capabilities as needed without replacing existing components.
- **Advanced Compatibility:** Seamlessly integrates with modern P25 Phase I & II and legacy VHF analog radio networks, simplifying the migration to digital communication systems.
- **Simplified Installation:** Wireless components minimize the need for extensive and costly wiring. This allows for easy installation in older stations and portability to new facilities, with most devices plugging into a standard wall outlet.
- **Health-Focused "Heart-Smart" Alerting:** Clinically validated technology utilizes tactile, visual, and ramped audible alerts to reduce the startling effects of traditional alarms. This improves firefighter health and safety, with studies showing a 169% improvement in self-reported health.

Traditional Solutions Are Station Centric: Our Newer Solution Shifts That Focus

The MCA Advantage: Your Partner in Modernization

Choosing the right technology is only the first step. MCA offers a carefully researched portfolio of innovative voice, data, and security solutions. This combined FSA-FFAS platform represents a best-in-class system that aligns with our commitment to firefighter safety and operational excellence. A consultation with our expert teams is the necessary first step to determine if this solution, is the right fit for your department.

Ready to build a safer, more efficient station?

Contact MCA today for a personalized consultation and demo to discover how this innovative, integrated system can modernize your alerting capabilities while prioritizing the well-being of your personnel.

About MCA

We believe every workplace should be safe, secure, and efficient. As trusted advisors, we deliver integrated communication, connectivity, and security solutions with a **Service First** mindset – *driven by a team that cares deeply about our customers and each other.*

Why MCA? At MCA, we help solve critical communication, connectivity, and security challenges with turnkey, integrated system solutions—from two-way radios and in-building wireless to video surveillance, access control, and more. MCA is built from over **50 companies** with deep technical expertise and strong local roots. **And we're still growing**—*expanding our capabilities, our reach, and our team.*

Our **100+ Solution Centers** bring together sales, installation, service, and customer operations teams to deliver seamless, nationwide support. Guided by our Service First value, we don't just connect the wires and walk away—we *provide customized solutions backed by deep expertise and lifecycle support.*
