

Body-Worn Camera Solutions for Safer, More Transparent Public Safety Responses

Real-Time Visibility and Secure Documentation for Public Safety Agencies

In today's world of rising threats, public scrutiny, and increasingly complex incident responses, body-worn cameras have become essential tools for protecting first responders and fostering community trust. Whether documenting high-risk encounters, coordinating multi-agency operations, or ensuring transparency after a crisis, body-worn cameras provide the evidence-grade visibility agencies need to safeguard personnel, validate actions, and enhance operational outcomes.

At MCA, we deliver public safety-grade body-worn camera systems from Motorola Solutions—designed to meet the dynamic needs of law enforcement, fire departments, and EMS agencies. Our solutions enable real-time response, integrated streaming, and secure digital evidence management, seamlessly connecting with broader communications, CAD, and command ecosystems.

Trusted by police departments, fire services, and EMS teams nationwide, MCA equips your agency with the tools to document every response, protect every responder, and confidently stand behind every decision.

Featured Body Worn Cameras

Motorola's body-worn cameras deliver unmatched clarity, durability, and real-time collaboration, empowering officers, medics, and firefighters with critical video capture and situational awareness when every second counts. Purpose-built for high-stakes field deployments, these devices integrate seamlessly with Motorola's software and communications ecosystem to enhance safety, accountability, and operational command.

Motorola SVX Body Camera & Wireless Microphone

The SVX body camera combines a wireless speaker microphone with HD video capture, allowing law enforcement and EMS personnel to carry fewer devices without sacrificing functionality. Designed as an accessory to Motorola's APX series radios, it supports encrypted communications, push-to-talk functionality, and secure footage transfer. This compact device mounts seamlessly on uniforms, making it ideal for tactical teams, paramedics, and field officers who need reliable, evidence-grade performance in the field.

Motorola V700 LTE-Enabled Body Camera

The V700 body camera empowers real-time situational awareness with LTE-enabled video streaming and GPS data integration. Perfect for dynamic law enforcement environments, it supports Record-After-the-Fact to retrieve uninitiated footage, extended battery life for 24/7 operation, and wireless evidence uploads. Integrated with M500 in-car systems, APX radios, and Holster Aware sensors, the V700 ensures seamless connectivity and operational efficiency when every second counts.

Motorola VB400 Rugged Body-Worn Camera

The VB400 is built to withstand the toughest conditions, making it a trusted choice for law enforcement, fire, and rescue teams. With HD video capture, pre- and post-recording, and peer-assisted activation, it ensures critical moments are documented. Its rugged design meets MIL-STD-810G and IP67 standards, while its 12-hour battery life and seamless integration with VideoManager provide dependable performance for every shift, no matter the environment.

Supporting Software Platforms

Integrated Evidence Control for the Public Safety Mission

MCA provides secure, scalable video management platforms that empower agencies to capture, store, review, and share critical evidence across the entire response lifecycle. Built for public safety workflows and compliant with rigorous evidentiary standards, these tools enhance operational clarity and streamline collaboration from the field to the command center.

Motorola Solutions VideoManager EL

Purpose-built for public safety, VideoManager EL ensures secure handling of video evidence across police, fire, and EMS departments. It offers cloud and on-premises deployment options with end-to-end encryption, ensuring CJIS compliance and chain-of-custody integrity. The platform integrates seamlessly with CAD and RMS systems for automated incident tagging, while also supporting evidence review, user permissioning, and retention management. Additionally, it provides native compatibility with Motorola's APX radios and V700, VB400, and SVX cameras, making it a comprehensive solution for managing digital evidence.

VB SmartControl: Secure Mobile App

VB SmartControl is a mobile companion app designed to enhance the functionality of VB400 cameras. It allows officers, medics, and responders to confirm proper camera positioning with real-time previews, review and tag footage directly from the field, and monitor battery and memory levels. Metadata can be synced with VideoManager upon docking, streamlining workflows and reducing post-shift workload. The app is compatible with both Android and iOS devices, ensuring accessibility and ease of use for public safety professionals.

Supported Integrations

MCA and Motorola Solutions ensure your body-worn video solutions work seamlessly with the broader public safety technology ecosystem.

- **APX Series Radios** – Trigger camera recording through emergency activation
- **M500 Systems** – Synchronized capture for full-scene documentation
- **CommandCentral Aware** – Centralized monitoring and coordination
- **CommandCentral DEMS** – Unified digital evidence management
- **CommandCentral AXS** – Dispatch systems and *Avtec Scout* integration

Applications Across Public Safety Agencies

Law Enforcement

Body-worn cameras play a critical role in supporting law enforcement by documenting arrests, traffic stops, and use-of-force encounters with evidentiary-grade video. These devices enable real-time supervision through live video streaming, allowing command centers to monitor and coordinate responses effectively. By promoting transparency and accountability, body-worn cameras help build public trust and strengthen case documentation for legal and investigative purposes.

Fire Services

For fire services, body-worn cameras provide invaluable documentation of fireground activity, rescues, and incident responses. They capture building conditions and inspection outcomes, offering critical insights for post-incident reviews and insurance documentation. Additionally, these cameras support debriefs and training sessions, helping fire teams refine their strategies and improve operational outcomes.

Emergency Medical Services

In EMS operations, body-worn cameras capture video of patient interactions, treatment procedures, and scene dynamics, providing a secure and factual record of events. These recordings assist in quality assurance and improvement (QA/QI) evaluations, as well as emergency medical training. By offering clear, documented evidence, body-worn cameras also help defend against complaints or liability, ensuring accountability and professionalism in high-pressure situations.

The Motorola Solutions Safety & Security Ecosystem

MCA's public safety body-worn camera solutions are integral to the Motorola Solutions Safety and Security Ecosystem — a fully connected framework that bridges frontline personnel, command centers, and judicial systems. With seamless integration into the CommandCentral software suite, these solutions enable real-time coordination, secure evidence transfer, and comprehensive visibility across every stage of your response workflow. From capturing incidents in the field to presenting evidence in the courtroom, MCA ensures your agency's video data is secure, accessible, and actionable exactly when and where it's needed.

Why Choose MCA?

As a Platinum-Level Motorola Solutions Channel Partner, MCA is a trusted solution provider for public safety agencies nationwide. We specialize in delivering, integrating, and supporting body-worn video and critical communications systems that enhance safety, accelerate response times, and protect both personnel and communities. Working closely with Motorola Solutions in concert with law enforcement, fire, and EMS agencies, we deploy resilient, purpose-built technologies designed to meet the unique and ever-evolving challenges of public safety operations.

About MCA

MCA is one of America's most trusted technology integrators, delivering world-class voice, data, and security solutions that enhance safety, efficiency, and productivity. With over 65,000 customers nationwide, we act as your trusted advisor, streamlining the research, installation, and maintenance of the right solutions for your operations. Backed by a nationwide team of certified professionals, MCA offers a service-first approach and comprehensive support for every stage of your technology life-cycle.
