

Healthcare Solutions

Enhancing Safety and Connectivity within Nursing Homes, Assisted Living Facilities, and Retirement Communities

In the ever-evolving healthcare landscape, ensuring the safety and well-being of residents within nursing homes, assisted living facilities, and senior living communities is of utmost importance. Meeting the unique communication, data, and security needs of these facilities is not just desirable; **it's a regulatory obligation**. Administrators must provide a *'safe, clean, comfortable, and home-like environment'* for all residents. Adequately satisfying these responsibilities necessitates innovative solutions from trusted providers. At MCA, we take pride in being the foremost advisor for creating safe, secure, and efficient workplaces. We offer tailored solutions designed to meet the challenges faced by these organizations, ensuring they not only fulfill regulatory obligations but also provide a nurturing and home-like atmosphere for their residents.

Ensuring Clear Voice Communications

As a distinguished platinum channel partner of Motorola Solutions, we go above and beyond to deliver custom tailored and state-of-the-art radio communications solutions for assisted care and senior living communities. We excel in providing robust and dependable digital radios from the MotoTRBO portfolio, specifically designed to meet the demands of healthcare environments. These radios ensure staff members have reliable and uninterrupted communication channels.

Furthermore, our expertise includes proficiently delivering and installing cutting-edge digital radio repeater systems. Among our exemplary offerings is the Capacity Max (CapMax) system, renowned for its innovative features. These systems are strategically placed within your facility, ensuring seamless communication for staff members working throughout the entire premises.

With our meticulously curated communication solutions and unparalleled expertise, we guarantee not just communication devices, but a seamless and dependable network. This network becomes the backbone of your facility, fostering an atmosphere of security, efficiency, and care.

Enhanced Coverage and Capacity

Beyond enhancing your internal radio networks for group communications, MCA hosts a specialized In-Building Wireless Solutions (IBWS) team. Staffed by NICET certified engineers, we excel in providing tailored communication solutions to meet the specific needs of your facilities and communities. Our expertise includes two unique in-building wireless solutions: one designed to improve public safety radio frequencies and the other to enhance public cellular network coverage and capacity.

Empowering First Responders

In times of emergencies, our ERRCS solutions shine by enhancing first responder communications capabilities within your facility. By ensuring flawless communication channels, we facilitate a coordinated response, minimizing response times and ensuring the safety of everyone involved. Our systems create a cohesive network that allows first responders to navigate the facility efficiently, ensuring they can focus on their critical tasks without communication hurdles.

Connecting Loved Ones

Cellular DAS elevates resident satisfaction, enabling effortless connections with loved ones via personal devices on public cellular networks. Whether through video calls or sharing updates, residents maintain essential connections, enhancing emotional well-being and fostering a sense of belonging. By bridging the gap between residents and families, it creates a warm, supportive environment where residents feel valued, engaged, and genuinely at home.

A Unified Security Ecosystem

At MCA, we recognize that the safety and security of residents and staff are not just important; they are essential requirements. Our state-of-the-art video surveillance systems, enriched with artificial intelligence, offer advanced threat detection and real-time monitoring. Our access control solutions employ stringent entry regulations, complemented by electronic door locking hardware and visitor management solutions, adding multiple layers of security to safeguard your premises effectively.

We meticulously configure your video surveillance, access control, electronic door hardware, and more to seamlessly work together, creating a unified and robust security ecosystem. This integration guarantees a proactive and efficient response to any security event, fostering a sense of safety and confidence among both residents and staff members.

To ensure the continuous operation of these systems, we provide our **SecurePlan™** monitoring and maintenance services. Beyond system installs, SecurePlan offers ongoing support by monitoring system uptime, addressing potential device malfunctions, and regularly evaluating your systems. Through proactive issue identification and resolution, SecurePlan ensures the longevity and effectiveness of your security hardware, maintaining a consistently high standard of facility safety.

About MCA

What sets MCA apart is our commitment to being your trusted advisor for a safe, secure, and efficient workplace. We understand the challenges faced by healthcare organizations of all types and sizes. By offering a carefully researched portfolio of voice, data, and security solutions, we reduce the time and effort needed to research, install, and maintain the right solutions. Our local sales and service teams provide assurance, *being there in the moments that matter* throughout the life of the solution.

We are the go-to partner for nursing homes, assisted living facilities, and senior living communities. Leveraging our proficiency in radio, cellular, and safety solutions, we guarantee the seamless and secure operation of your facilities, prioritizing efficiency and, above all, safety. By choosing MCA, healthcare providers can focus on what truly matters – **providing exceptional care to their residents.** *Leave the rest to us.*
