

## On-site Device Installations and System Implementations

### Multi-Location IoT Deployments Into Fixed and Mobile Assets

Professional installation of wireless communications systems reduces your organizations downtime and drives your IoT solution to deliver the results you demand. From large scale national enterprise fleets to local public safety departments, the cellular networking solutions team MCA brings decades of leadership in cellular device, mobile computing, and communications systems deployments to your project.

#### Fleet Deployments | [Mobile IoT Installations](#)

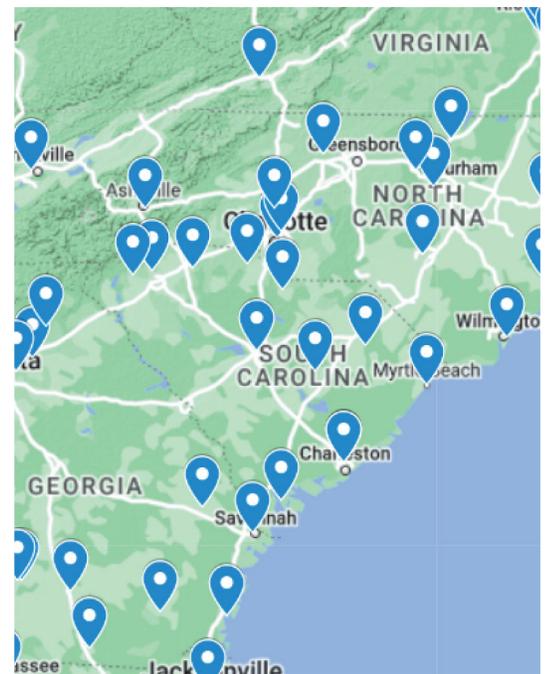

We employ hundreds of certified and seasoned install techs across dozens of local field offices. Our on-site fleet install services are most valuable to organizations with large fleets — especially those that are housed across multiple locations. With our close cellular carrier relationships, DevProv+ suite of services, and decades of experience, you and your organization can rest assured your deployments will be completed on-time, and to your specifications.

#### Fixed Equipment and Facilities | [Fixed IoT Deployments](#)

Our clients most often utilize these install services when projects involve multiple locations that will require strategic antenna and equipment placement. We also help organizations engineer and install customized NEMA enclosures for data communications in both rural and urban outdoor environments. Just like with our mobile installations, you can trust in MCA's expert technicians to install your devices on-site, on-time, and on-spec.

#### Multiple Locations | [Over 80 Facilities Spread Across 13 States](#)

MCA's CNS team can deploy technicians from over 80 field offices, located across 13 states, (with 12 offices in South Carolina alone) allowing us to offer our installation services over a considerable footprint. No matter your install needs, whether for mobile vehicles and assets or fixed equipment and facilities we can accommodate them. For small fleet installations you can bring your vehicles to our garages, and for larger, qualified installations, our team can come to you.

#### The Team | [Device Provisioning, Activation, and Installation Services](#)

For the last 27 years, MCA's cellular networking solutions team has provided expert connectivity solutions to public and private organizations in need of top-of-the-line connectivity devices and platforms to manage their vital communications infrastructure. We provide top-tier support for all aspects of our customers mission and business-critical connectivity projects. Our technicians and installation teams assess your needs and engineer customized solutions to outfit your organization with the hardware and software required to fit your exacting needs.
