

EXPRESS M2M

Express M2M (EM2M) Overview

EM2M is a 4G and 5G cellular data offering from MCA, targeted at low usage Internet of Things (IoT) solutions. Examples include SCADA systems found in Utilities and Municipalities, self-serve kiosks or ATMs and remote monitoring or sensor deployments for solutions such as digital signage.

Additional Services: DevProv, Private APN and Static IP

DevProv+ is a suite of WWAN services designed to reduce your total cost of ownership and increase efficiency of your IoT deployment by providing pre-deployment provisioning and post-sales support services for your network devices. Private APN and Static IP are both available for enhanced security (*additional charge*).

Program Pricing

Rate Plan	Data Package	MRC	Overage
