Safe Hospitals | Patient Elopement

How Can You Help Keep Wandering Patients Safe?

MOTOROLA SOLUTIONS

After surgery, or while under nursing care, patients can become confused, and attempt to leave their bed, or even the facility itself, while trailing medical equipment in their wake.

Operational View

Detect
CAMERA SURVEILLED CORRIDORS
Security retroactively searches historical footage for the patient the floor team reported to have left their room.

Analyze
CAMERA APPEARANCE SEARCH
Security pulls image of patient on file to automatically search all cameras to track movement and determine their location.

Communicate
SECURITY TEAMS COORDINATED
Closest security officer or hospital staff to the patient is determined and dispatched to retrieve the patient.

Respond
INCIDENT PROMPTLY RECORDED
Hospital security rendered the patient safe in a timely manner and an incident report is securely logged.
