

## Security Solutions | Detection Systems

MCA's Perimeter, Intrusion, and Weapon Detection Solutions Keep You Safe

### Perimeter Detection

Gates, bollards, and turnstiles help keep external threats from accessing your property and minimize risks posed by active shooters, terrorists, protestors, ex-employees, and others looking to threaten the safety of your employees, property, and business itself. Our varied perimeter detection solutions protect your facilities while controlling the seamless flow of people — providing the safety, guidance, and experience your employees and guests deserve.

### Intrusion Detection

Unwanted visitors can damage your property, harm your people, threaten the safety of your workplace, and completely disrupt your business.

Intrusion detection solutions expertly designed and installed by MCA's team of certified technicians, include proactive video monitoring and alarm monitoring, help prevent intruders from harming your people, damaging your equipment, and hindering your business operations.

### Weapon Detection

MCA's latest weapon detection systems utilize cutting-edge artificial intelligence (AI) to spot weapons better than traditional metal and weapon detection technologies (WDT). The WDT's MCA helps its clients deploy use AI and sensor technology to help prevent loss of life and offer benefits that surpass basic weapon screening solutions with up-to-date weapon security, proactive weapon detection, and the most efficient WDT available today.

### Proactive Video Monitoring

Our proactive video monitoring systems verify intruders and intervening with a live audio warning, helping to:

- Deter Theft or Damage
- De-escalate trespassing
- Safely reduce loitering
- Augment guard services
- Future-proof security

### Alarm Monitoring

Our alarm monitoring systems detect intruders on entering your property.

When you choose MCA for alarm monitoring, your business will be protected by MPLS-connected full-volume data centers, CTI-integrated switching gear, and additional cutting-edge technologies.

### UL 2050 SCIF Certification

Our UL 2050 SCIF certification means that we meet DoD regulations to install your alarm monitoring systems in facilities housing classified materials.

While not every security integrator can provide these services, the team at MCA can be relied upon for UL 2050 SCIF-certified installers.

### Why MCA? | Device Selection, Network Design, System Implementation, and Managed Services

**We are the trusted advisor for a safe, secure, and efficient workplace.** MCA offers a carefully researched portfolio of voice, data, and security solutions. As your trusted advisor, we reduce the time and effort needed to research, install, and maintain the right solutions to make your workplace better. When you choose MCA, you're also connecting to our Service-First DNA. With our Managed Technology-as-a-Service (MTaaS) offering, you'll never be surprised by hidden costs or fees. We offer a flat, budget-friendly recurring cost without additional finance charges. Our team of experts will manage your solution from start to finish, giving you the best return on your investment.

When combined with our SecurePlan™ suite of tools and services, we proactively support our customers by ensuring SLA terms compliance — remotely troubleshooting and capturing information, monitoring for predictive signals such as drive failure alerts, thermal conditions, and network loads — to address them prior to failure, maximizing the uptime of your critical security systems. Avoid training employees on how to use our solutions: when you partner with MCA, we shoulder the burden of managing technology upgrades and creating road maps for technology upgrades while maintaining and supporting your solution throughout its life-cycle.
