3 MP

5 MP

The Avigilon H6SL Camera Line combines adaptability with top-notch performance, thanks to its advanced analytics capabilities. These cameras, available in bullet or dome form, are suitable for a wide range of indoor and outdoor uses within sectors such as education, commercial, government, retail, and hospitality. They ensure excellent protection for both individuals and property. With Next-Generation Video Analytics, H6SL cameras can detect crucial events proactively, enhancing your situational awareness of your premises. Regardless of difficult lighting conditions, the H6SL enables you to observe your site with utmost clarity and precision.

#### Next-Gen Analytics

Detects more objects with an expanded database of object classifications with greater accuracy for faster responses, even within crowded areas.

#### Wide Dynamic Range

Unlock the power of capturing crystal-clear details, even in scenes with extreme variations of light and dark within the same frame.

#### Long Range Options

Achieve optimal site coverage with long-range lens options. Use the microphone accessory for the indoor dome, to capture greater evidentiary detail.

#### Adaptive IR Options

Using this feature ensures image clarity by adjusting the infrared settings to capture details in low-light or no-light environments.

#### Rugged Built

Select models shield and protect against environmental hazards, offering varying degrees of impact, water, windblown dust, and corrosion resistance to withstand tough conditions.<sup>1</sup>

#### FIPS Compliant

Increase data security levels with optional license(s) for FIPS-compliant encryption on each of your cameras<sup>2</sup>, with an onboard TPM<sup>3</sup> to secure cryptographic keys and Secure Boot.

#### ONVIF<sup>®</sup> Compliant

ONVIF Profile S and T simplify integration with existing ONVIF infrastructure. Profile G ensures seamless search, playback, and retrieval of recordings. Profile M enables smooth interoperability with third-party analytics.

#### SmartCodec<sup>™</sup> Equipped

H.264 and H.265 HDSM codecs provide significantly improved bandwidth management allowing you to achieve maximum image detail in all lighting using less bandwidth than ever before.

<sup>1</sup> IK10 rating available on all models; IP66/67 and NEMA 250 Type 4X rating available on outdoor models only. <sup>2</sup> Optional purchase of FIPS Level 1 camera license (CAM-FIPS). <sup>3</sup> FIPS 140-2 Level 3-compliant trusted platform module (TPM). \*MOTOROLA, MOTO, MOTOROLA SOLUTIONS, Avigilon, and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license.
