

Fact Sheet | H5A Multisensor Camera

Coverage From All Angles

- 9 MP
- 12 MP
- 15 MP
- 20 MP
- 24 MP
- 32 MP

Ensure comprehensive coverage of indoor and outdoor sites with Avigilon H5A Multisensor cameras, a powerful solution that combines Next-Generation Video Analytics with three or four adjustable sensors. With a single camera, you can monitor virtually any area, regardless of lighting conditions, thanks to its 360-degree views. This versatility makes the H5A Multisensor ideal for securing expansive spaces such as outdoor building corners, parking lots, crossroads, as well as indoor areas with high ceilings, long corridors, high trafficked areas, and hallway intersections.

Next-Gen Analytics

Benefit from expanded object classifications and heightened accuracy, enabling the system to detect a wider range of objects efficiently.

Varifocal Lenses

Customize the field of view to protect your site optimally while enjoying a seamless viewing experience with lens distortion correction.

Rugged Built

Safeguard your camera against impact, water, windblown dust, and corrosion with robust IK10, IP66/67, NEMA Type 4X, and TS2 ratings.

FIPS Compliant

Meet the stringent data security standards of government agencies and heavily regulated enterprises effortlessly. With FIPS-compliant cryptography support, integrated TPM, and Secure Boot.

ONVIF® Compliant

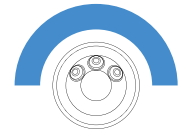

ONVIF Profile S and T simplify integration with existing ONVIF infrastructure. Profile G ensures seamless search, playback, and retrieval of recordings. Profile M enables smooth interoperability with third-party analytics.

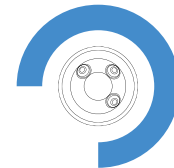

SmartCodec™ Equipped

H.264 and H.265 HDSM codecs provide significantly improved bandwidth management allowing you to achieve maximum image detail in all lighting using less bandwidth than ever before.

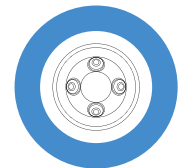

180° Coverage

270° Coverage

360° Coverage
