

STANDARD & HEAVY DUTY GRAPPLE RAKES

Our Grapple Rakes are ideal for raking and loading debris. The shape of the grapple makes it easy to roll debris into tight places. A single grapple or two independent grapples are available. We use American made cylinders, rated at 4,000 psi, to handle the toughest jobs. Our re-designed Standard Duty Grapple Rakes are constructed from 3/8th AR400 Steel, and are rated for machines with 35-60 HP. The new design provides more strength, combined with a lower weight to maximize your grappling power. Our Heavy Duty Rakes are built with 1/2" top quality steel and are rated for 50-70 HP machines.
