SNOW BLOWER**

# SNOW CANNON™ SERIES

## SKID STEER SNOW BLOWER

The IronCraft Skid Steer Snow Cannon™ is a great choice for moving vast amounts of snow very quickly. After the toughest blizzards and snow storm conditions, our snow blower attachment offers a 14” auger and single stage hydraulic blower running at a flow rate of 15-25 GPM.

The cannon comes with replaceable skid shoes to move easily across the ground. It also comes standard with a bolt-on cutting edge to clear snow down to the pavement and is easy to replace. Tough and trustworthy like the IronCraft name itself.

### 180° CHUTE

An electric controlled gear drive chute with a deflector that can rotate 180 degrees so the operator can change directions on the fly. Optional chute actuator is also available for the deflector.

### QUICK FEATURES

- Sizes – 60”, 66”, 72”, 78”, 84”
- 15-25 GPM flow rate
- Chute rotates 180°
- Optional chute actuator
- Replaceable skid shoes
- Available in 7, 8, and 14 pin or a universal controller.
