Nitrogen Charge Pressure	250 PSI
Operating Pressure (PSI)	1,700
Tilt Angle (Tilt versions only)	15 degrees left & right
Weight	1,186 - 1,656 lbs.
Width	46"

## KEY FEATURES

The key to this post driver is at its heart. We use a nylon isolated nitrogen charged powercell for rapid, powerful actuation and minimal vibration to the machine and operator. The post guide housing encloses the bottom of the drive head, making it easy to keep the driver on the post. Multiple guides come standard for posts from 2" and up.
