

Our receiver hitch makes it easy to move trailers around the yard using your skid steer. While it uses the same ball mounts you use in your other vehicles, hooking up only takes a fraction of the time required to hook a trailer to your truck.

RECEIVER HITCH SPECS

GOOSENECK RECEIVER HITCH SPECS

3-POINT HITCH

The 3-Point Hitch is handy to have around the farm. Simply drive your skid steer up to the implement, hook it up and go. No need to get your tractor out, just to move some attachments around. Available in cat 1 or cat 2.
