

A **TMV** [Thermostatic Mixing Valve] is required in homes that do not have a TMV fitted, If the hot water coming out your tap is more than **50°C** you will need to adjust your TMV.

1. We recommend placing your **TMV** directly after your hot water/ boiler unit. Consult with a **licensed plumber** to discuss the best position for your needs.

— TEMPERED WATER   
 — COLD WATER   
 — SCOLDING WATER

- 1. Directly after your hot water unit
- 2. Inside a service panel
- 3. Inside a service panel behind removable mirror
- 4. Inside the bathroom vanity unit
